Zoran Madzar Intex Corporation, F15.60 Subcommittee Chairman,

Matthew Walen, Intex Corporation,

Molly Lynyak, ASTM Staff,

Dotty Drago, Drago Expert Services,

Don Mays, Product Safety Insights, LLC.

See ASTM for a complete list of meeting attendees

Summary of Meeting:

The status of ASTM F2666-16 Standard Specification for Aboveground Portable Pools for Residential Use was discussed. ASTM policies on revised standard dates require publication within eight years, or the standard is withdrawn and become inactive. There is a 2016 revision date associated with the ASTM F2666 standard, and it needs balloting with reapproval in 2024. There will be a reapproval ballot issued in February or early March 2024.

There is on-going research regarding climbability testing with young children. The F2666 standard will be balloted for reapproval revisions with future ballots expected in the climbability and child resistance testing.

Next Steps:

A ballot for reapproval of ASTM F2666-16 Standard Specification for Aboveground Portable Pools for Residential Use will occur in the February to March 2024 timeframe.
