### **Summary of Meeting:**

Objective: Establish new guidelines for the performance criteria and warnings for hydrogel launchers and projectiles used with hydrogel launchers.

Members continued editing the draft document with focus on finalizing the performance and test methods section. The group worked through questions raised regarding the introduction section and definition of hydrogel projectile. Additional text carried over from airsoft projectiles was deemed irrelevant to the subject products and removed. Additional discussion and considerations were had regarding accidental discharge performance requirements and revised language will be discussed at the next meeting.

### **Next Steps:**

The next meeting is scheduled for March 20, 2024.
