Summary of Meeting:

The scope sub task group met to discuss which items should be included in the proposed new standard for “Residential Furniture and Furnishings used for Storage - Equipped with Lids”. The group continued to discuss further refinements to the scope of the draft standard. It was agreed that plastic storage bins, items primarily intended for sleep and end tables/coffee tables would not be part of the standard. To exclude items like end tables and coffee tables a minimum height of around 20 inches was discussed. It was stated that most ottomans currently on the market are equal to or less than 20 inches but that a market survey would be conducted. The continuous storage space of the toy standard will be used as a reference for a minimum dimension for inclusion in the scope.

At the next sub task group meeting the task group will review a more refined draft of the scope.

Next Steps:

The next sub task group meeting will be in April.
