FILING DATE: April 1, 2024 (Revised May 6, 2024)

CPSC ATTENDEE: Evan Heimbach, ESEF
Arthur Lee, ESEF
Andrew Trotta, ESEF

NON-CPSC ATTENDEE(S): Please contact UL Standards and Engagement (ULSE) staff for the full list of attendees

SUMMARY OF MEETING:

UL Standards & Engagement sent out the proposed first edition of the Standard for Safety for Power Banks, UL 2056 for ballot and comment on September 8, 2023, with votes and comments due November 17, 2023. The proposed Standard achieved initial consensus but had several comments that needed to be resolved before ULSE proceeded with Recirculation. CPSC staff (October 20, 2023 letter to ULSE) and Health Canada staff both made comments on the proposed draft and attended the meeting to support their comments and negotiate the prospective revisions. The standard is intended to be issued as a binational standard with Canada; ULSE will accordingly issue a French-language version of the final.

The representative from UL Solutions walked through each comment and led a discussion to resolve it either by the commenting organization accepting, rejecting or reaching a compromise resolution. Other attendees also were able to contribute to the discussion and comment resolution.

Please contact ULSE staff for the meeting notes.

NEXT STEPS:

ULSE staff will incorporate the revisions into the proposed first and recirculate to the TC members for final balloting.
