

## **MEETING LOG**

**MEETING TITLE/SUBJECT:** UL 2201A Generator Tent Flammability Working Group

**FY 25 OP PLAN ENTRY:** [Not on the FY 25 Op Plan], Portable Generator Tents

**DATE OF MEETING:** 6/18/2025

**LOCATION OF THE MEETING:** Virtual

**CPSC STAFF FILING MEETING LOG:** Scott Ayers

**FILING DATE:** 6/20/2025

**CPSC ATTENDEE(S):** Scott Ayers (ESEF)

**NON-CPSC ATTENDEE(S):** Contact ULSE for a list of attendees.

### **Summary of Meeting:**

Contact ULSE for more details.

The UL 2201 technical committee formed this working group to develop a proposed standard for generator tents, tentatively designated UL 2201A. This was the initial meeting of the working group.

Prior to the meeting, the working group chair sent some draft language covering the proposed scope, definitions, and some requirements to the working group members. The draft was not complete but contained enough information for the working group to discuss.

The members discussed the proposed draft, and staff provided feedback on the draft. Staff suggested that the scope focus on a more succinct set of products; the draft scope included any assembly used with a generator. Staff also suggested that the scope focus on general safety and not just flammability of generator tents.

For the next meeting, the chair will work with ULSE on updating the draft scope of the standard and will outline the requirements, both requirements that should be included in the initial version and requirements that may need to be included in future revisions of the standard.

### **Next Steps:**

The next meeting will be scheduled after the working group chair discusses the new scope with ULSE staff. Staff will participate as able on future meetings.
