### **Summary of Meeting:**

This was a general subcommittee meeting held as part of the ASTM E05 Committee Spring 2025 meetings. The meeting was in person in Toronto, ON with staff participating virtually.

The subcommittee conducted regular business, including task group reports on their respective meetings earlier in the day. Under new business, the CPSC staff proposed a new standards activity on classification of consumer products in the defensible zone and solicited interest from stakeholders. The subcommittee accepted a request to form a working group for the proposed new standard. Participants volunteered to participate. CPSC staff will meet with interested participants before the December 8-11 ASTM E05 Winter meeting in Atlanta.

### **Next Steps:**

Staff will work with interested participants to schedule a kick-off meeting.
