

MEETING LOG

MEETING TITLE/SUBJECT: ASTM F15.45 Candle Glass Task Group

OP PLAN ENTRY: Candles and Candle Accessories

DATE OF MEETING: 6/25/2025

LOCATION OF MEETING: Virtual

CPSC STAFF FILING MEETING LOG: Scott Ayers

FILING DATE: 6/25/2025

CPSC STAFF ATTENDEE(S): Scott Ayers (ESEF)

NON-CPSC ATTENDEE(S): Contact ASTM for a complete list of attendees.

Summary of Meeting:

Contact ASTM for more details of this meeting. The five-year review period is due for ASTM F2179-20, the Standard Specification for Candle Glass Containers. The ASTM F15.45 subcommittee established a task group to review the standard and either propose a new revision or reapprove the current version. The group started meeting in May 2025.

Participants discussed refillable candle containers for most of this meeting. Staff suggested that the full candle fire safety task group should be involved in the discussion. The group will propose developing requirements for re-using glass containers as candles to the candle fire safety task group. The group will brainstorm ideas in August for the September in-person meeting in Columbus.

Participants also discussed that the standard only applies to soda-lime glass. A participant discussed that boro-silicate glass is less prone to thermal stress, but that it is possible that heat can cause glass to break. The group decided that ASTM F2179 should cover all glass and not just soda-lime. Staff supported that decision.

Next Steps:

The next two task group meetings will be Wednesday July 23, 2025 from 10am to 11am ET and on Wednesday August 20, 2025 from 9:30am to 10:30am ET.
