

MEETING LOG

MEETING TITLE/SUBJECT: ASTM F15.45 Candle Glass Task Group

OP PLAN ENTRY: Candles and Candle Accessories

DATE OF MEETING: 7/23/2025

LOCATION OF MEETING: Virtual

CPSC STAFF FILING MEETING LOG: Scott Ayers

FILING DATE: 7/24/2025

CPSC STAFF ATTENDEE(S): Scott Ayers (ESEF)

NON-CPSC ATTENDEE(S): Contact ASTM for a complete list of attendees.

Summary of Meeting:

Contact ASTM for more details of this meeting. The five-year review period is due for ASTM F2179-20, the Standard Specification for Candle Glass Containers. The ASTM F15.45 subcommittee established a task group to review the standard and either propose a new revision or reapprove the current version. The group started meeting in May 2025.

The task group recommends that borosilicate glass be added to the scope of ASTM F2179. Staff agreed with this recommendation. The task group also discussed refilling glass candles. Staff suggested that refilling a glass candle should be covered by the candle making kit group and that F2179 should only include glass-specific requirements for re-useable glass vessels, if needed. Both topics will be discussed during the September meeting in Columbus, OH.

Next Steps:

The next task group meeting, originally scheduled for August 20th, was canceled. The task group will meet next in Columbus during the ASTM F15.45 in person meeting on September 24th and 25th.
