

MEETING LOG

MEETING TITLE/SUBJECT: CANENA UL/CSA 60335-2-40 Working Group Meeting

OP PLAN ENTRY: Flammable Refrigerants

DATE OF MEETING: 4/16/2026

LOCATION OF MEETING: Virtual

CPSC STAFF FILING MEETING LOG: Scott Ayers

FILING DATE: 4/16/2026

CPSC STAFF ATTENDEE(S): Scott Ayers (ESEF)

NON-CPSC ATTENDEE(S): Contact Azora Consulting for a complete list of attendees

Summary of Meeting:

Contact Azora Consulting for more details of this meeting. This working group is focusing on potentially developing requirements for A3-classified flammable refrigerants, including R290 (propane) and R600 (butane). The working group chair shortened the meeting to 1 hour prior to the start of the meeting.

The group discussed a recent in-person meeting at Oak Ridge National Laboratory. Several participants attended and shared information on the meeting. It is unclear if the presentation slides from the meeting will be publicly shared. The group also discussed recent California wildfire code changes that affect products located within 5 feet of the home. Some group members in the industry expressed concerns about how those changes will apply to HVAC equipment with flammable refrigerants. Staff may prepare a presentation on their wildfire work for this group in the future.

The working group chair expects the currently worked-on revisions to UL/CSA 60335-2-40 will be submitted to ULSE CSDS before the end of the year, 2026 and that the next revision of UL/CSA 60335-2-40 will be published sometime in the next year, 2027.

Next Steps:

Staff will attend meetings as able. Staff will discuss presenting with the working group chair in the future.
