

MEETING LOG

MEETING TITLE/SUBJECT: ASTM F15.02 Task Group Meeting on Torch Style Lights

FY 24 OP PLAN ENTRY: Lighters

DATE OF MEETING: 5/26/2026

LOCATION OF MEETING: Virtual

CPSC STAFF FILING MEETING LOG: Scott Ayers

FILING DATE: 5/27/2026

CPSC ATTENDEE(S): Scott Ayers (ESEF) and Kristen Talcott (ESHF)

NON-CPSC ATTENDEE(S): Contact ASTM F15.02 for more information on this meeting

Summary of Meeting:

In September 2025, the ASTM F15.02 subcommittee re-formed a working group to develop a new standard for torch-style lighters. The group is taking over from a previous working group, which had not met since May 2024.

The working group lead discussed a recent ISO meeting. ISO also has a working group developing a similar new standard; for now. The working group also discussed a proposed scope for the new standard. The working group wants to define a scope between products covered by ASTM F2201 and products covered by UL 147 and CGA 2.29. Some working group members discussed the applicability of the CFR on these products; however, staff advocated for the working group to develop requirements outside of child resistance. Staff will ask CPSC compliance staff on the definition of “micro-torch” as used in the CFR.

Next Steps:

The working group will meet next in person on June 30th at CPSC. Staff will ask CPSC compliance on the definition of “micro-torch”.
