Summary of Meeting:

NFPA 58 technical committee formed a task group to review the public comments for the second draft of NFPA 58. The task group will present the responses at the TC scheduled in August.

The task group chair explained the group's purpose. Public comment suggested replacing redundant LP-gas container phrases with cross-references. A group member noted repeated phrases across chapters referencing different chapters in NFPA 58, despite being identical. The group decided to use cross-referencing so that all references pointed to the same location, and staff agreed. The chair and project manager will finalize and prepare to present at next month's TC meeting.

Next Steps:

No task group meetings are currently scheduled for the future.
