

CPSC Use of 1USG Notification Messaging at Import

Updated June 2026

Summary: This document updates the public on the U.S. Consumer Product Safety Commission’s (CPSC’s) use of One U.S. Government (1USG) Notification Messaging at Import (also referred to as “Two-Way Messaging”) to assist U.S. Customs and Border Protection’s (CBP’s) review of consumer products entering U.S. commerce. For certain product categories, the importing community¹ managing the process will receive an “Under Review” message for an incoming product of interest, signifying that CPSC is electronically reviewing that entry. If CPSC selects a shipment for examination, either at the port or at the importer’s premises, the importing entities will receive additional messaging through the Automated Commercial Environment (ACE). This additional notification allows CPSC to indicate that a product examination is required.² Although CPSC’s review may delay the notification of a 1USG release status for products of interest, it will not impact the flow of goods through the border, unless CPSC determines that an intensive examination is required, and CBP concurs.³

Methodology: As CBP continues to modernize ACE, CPSC has been integrating its International Trade Data System/Risk Assessment Methodology, known as ITDS/RAM, with ACE, to coordinate efforts with CBP and the trade community regarding product examinations and disposition results. Using established messaging under PGA coordination, known as “Event Messaging,” CPSC will be able to notify CBP more effectively of the need to examine cargo at the border.

CPSC has developed an overall entry review plan for 1USG notification. It allows for faster review by CPSC of low-risk shipments at the port. Table 1 provides details on the timeframes for CPSC’s review of data for higher risk imported products under the agency’s jurisdiction.

TABLE 1: CLOCK PRIORITIZATION IN RAM

Mode of Transport	Entry Filed without Additional Risk Factors	Entry Filed has Additional Risk Factors
Air and Truck	4 Business Hours after Entry is Filed	8 Business Hours after Entry is Filed
Ocean	8 Business Hours after Entry is Filed	16 Business Hours after Entry is Filed
Express *	Auto May Proceed until eFiling is implemented	
Other	Not Currently Subject to CPSC 1USG	

* - Express will begin Two-Way messaging in June 2026 with an automatic May Proceed until some time period after eFiling is implemented. CPSC is working with industry to better define processes in the express

¹ The importing community primarily consists of importers, brokers, or express carriers and tends to be the primary agent managing the importation.

² This process does not supersede CPSC’s domestic investigatory authority to review shipments of products once they enter the country. It is possible for a “May Proceed” message to be issued through ACE, with a subsequent CPSC manual notification after 1USG review, to indicate that CPSC will examine products at the importer’s premises.

³ The 1USG message is a status, or Partner Government Agency (PGA) paperwork completion message. The ACE 1C message is the release message to Trade. They are distinct messages that indicate different processes are complete. The 1C releases cargo, not the 1USG. For additional information on 1USG Messaging at CBP, see: [ACE Glossary of Terms FINAL 12-23-15.pdf \(cbp.gov\)](#).

1USG Notification - Website Guidance Update

environment.

Please note, CPSC will calculate business hours from the time CPSC receives the entry, calibrated to the time zone of the Port of Entry code provided on the entry, based upon the federal calendar, 8am to 4pm in the time zone where CPSC staff is working. The majority of shipments receive an automated “May Proceed” message initiated by CPSC systems. During their review, however, CPSC staff co-located at the ports, or in coordination with CBP, can signal an intent to examine through a(n):

- Hold Intact Notice;
- Hold Intact Notice with Documents Needed for Review – A Hold Intact with additional messaging to indicate documents are required for CPSC review. The message will detail which documents to load into the Document Image System (DIS);
- Intensive Exam Request – A message to CBP from CPSC requesting the Entry to be stopped at the port for examination (brokers would see only the resulting confirmed CBP Hold with any accompanying message from CPSC); or
- Intensive Exam Request with Documents Required Request – An Intensive Exam Request to CBP from CPSC with additional messaging stating documents required for CPSC review. The message will detail which documents to load into DIS. Again, the broker would be notified only of a resulting CBP Hold that would have an accompanying message that lists the documents needed and any other information.

The type of messaging from CPSC to CBP/trade will depend on several factors, including, but not limited to, possible noncompliance with safety standards or regulations, and the risk a product poses to consumers.

This process update will also include the transmission of a CPSC Form 354 (Notice of Conditional Release), when applicable, to DIS for brokers to access when the “Hold Intact Notice” and the “Documents Review” examination statuses are activated. Brokers will receive notification of these statuses for their entries and will be able to retrieve the corresponding CPSC Form 354 from DIS.

Two-Way Messaging covers the product categories below. The list somewhat increased in June 2026, as listed below, in anticipation of eFiling:

- ATVs and similar off-road vehicles
- Children’s Products:
 - Art Sets
 - Toys
 - Pacifiers
 - Backpacks
 - Clothing:
 - Sleepwear
 - Infant articles
 - Imitation Jewelry
 - Cribs
 - Other Durable Furniture
 - Infant Bath Seats
 - Infant Sleep Products
 - Safety Gates
 - Baby Carriages

- Stationary Activity Centers
- Shoes
- Button Cell and Coin Batteries (Reese's Law)
- Liquid Nicotine
- Lawnmowers
- Clothing Storage Units
- Mattresses
- Bicycle Helmets
- Generators
- Hair Dryers
- Bicycles and other electric-powered cycles
- Holiday Lights
- Lighters
- Rugs
- Pellet Stoves
- Power and Extension Cords
- Fireworks
- Matchbooks
- Drywall
- Adult Clothing Articles, including Scarves

Frequently Asked Questions:⁴

1. ***Is cargo free to continue to move through the port after the "Under Review" message is received, but before the "May Proceed" is sent?*** Yes, cargo continues through the port unimpeded, unless CPSC requests an "Intensive Exam," or an "Intensive Exam with Documents Required Request," and the request is approved by CBP, or if CBP or another PGA has reason to examine the cargo under their authority.
2. ***What messaging will trade receive from CPSC?*** Trade will initially receive an "Under Review" message if an entry is filed containing a Harmonized Tariff Schedule (HTS) code of interest to CPSC (see list of product categories above). In addition, if CPSC determines that an examination is needed, trade will receive an "Intensive Exam," "Intensive Exam with Documents Required," "Hold Intact," or "Hold Intact with Documents Review" message.
3. ***Will my shipment be stopped automatically at the border if it has goods covered by those HTS codes?*** No. This messaging alone will not stop cargo. CPSC must request an intensive examination for CBP to stop the cargo for CPSC purposes.
4. ***How long will it take CPSC to review the entry data and complete its review? How much time is this adding to the processing of my entry?*** After receiving the entry information, CPSC intends to review the data promptly and provide the disposition back to trade, usually via a "May Proceed" message. If CPSC does not complete its review within the proposed period outlined above, a "May Proceed" notification will be sent automatically.

⁴ Questions and Answers will be updated periodically to maintain utility for the trading community.

5. **What happens if CPSC does not respond in a timely fashion?** When the stated timeframe expires without further action, CPSC systems will automatically send a “May Proceed” message to ACE. If no additional requirements were placed by other agencies, this will trigger the 1USG Notification.
6. **What defines CPSC Business Hours at the port?** CPSC participation at the ports to examine and enforce its statutes and regulations is limited to the operating hours of the Examination Stations where exams take place. To align with this limitation, CPSC uses a business clock of 8am to 4pm in the time zone where its staff is working on days when the Federal government is open.
7. **Will this review happen 24/7, 365 days of the year?** CPSC staff reviews the data during business hours. A “May Proceed” message will be issued automatically after the established timeframe if CPSC has taken no action.
8. **Why is CPSC making this change?** The change is intended to facilitate real-time, transparent communications among all parties. By automating requests through ACE, CPSC can more effectively coordinate with CBP about potentially noncompliant products arriving in the United States and allow its investigators the opportunity to examine them at the port. In addition, CPSC can facilitate the flow of compliant products into the country more effectively.
9. **How can trade participants learn more about this process?** CPSC will provide updated information on its website: www.cpsc.gov/imports.
