

MEETING LOG

SUBJECT: ASTM F15.42 Furniture Subcommittee's Task Group on Wall Anchors for ASTM F3096 (Tip Restraints) Meeting Log

FY 26 OP PLAN ENTRY: Clothing Storage Unit (CSU) Tip-overs

DATE OF MEETING: 5/13/2026

LOCATION OF MEETING: Virtual

CPSC STAFF FILING MEETING LOG: Kristen Talcott

FILING DATE: 5/22/2026

CPSC ATTENDEE(S): Kristen Talcott (ESHF), Daniel Taxier (ESMC), Suad Wanna-Nakamura (HSPP)

NON-CPSC ATTENDEE(S): Contact ASTM for the full attendee list

Summary of Meeting:

This task group is focused on potential requirements for drywall anchors used to connect anti-tip devices to the wall. The mission of the group is to determine how to ensure that the drywall anchors supplied with an anti-tip device can hold expected forces, including horizontal pull-out forces. In this meeting, task group members discussed plans for an onsite wall anchor strength testing meeting planned for late June 2026. Discussion included which wall anchors to test, construction of the test fixtures, and who will supply and transport test materials to the test site. The goals of the testing include determining whether proposed drywall testing is feasible, refining the test method, evaluating repeatability of wall anchor testing, exploring potential modifications to the test method (e.g., smaller drywall pieces), and determining general performance of wall anchors.

Next Steps: The next task group meeting is scheduled for June 10, 2026. CPSC staff plan to attend the onsite testing meeting in late June.
