SUMMARY OF MEETING:

Background: The ASTM Subcommittee F15.29 on Playground Equipment for Public Use formed a task group (TG) to develop performance requirements for play mounds.

Summary:

The task group discussed the hazards the performance requirements should address. The task group and CPSC staff agreed the performance requirements should address:

- Falls to the surface of the mound's base
- Falls to the mound from equipment
- Falls/use onto unlevel surfacing
- Running/sliding into equipment
- Tripping on the mound
- Falls onto equipment placed on the mound
- Entrapment

Next Steps: The TG will provide feedback on the list of suggestions to the subcommittee in November.
