Reporting Instructions

To ensure consistency across agencies, please use the guidance below to determine which peer reviews were “conducted” during each fiscal year, and thus should be reported.

- Include reviews for which the peers have provided the agency with their (final) comments, regardless of whether the agency has:
 - completed its response to the reviewers, or
 - made the peer review comments public.
- Exclude peer reviews:
 - for which the peers are still considering the information,
 - that are planned for the future, or
 - that were planned for the current or prior fiscal years, but were not conducted.

***Departments and stand-alone agencies that reported in the past that they do not produce information subject to the Bulletin do not need to fill out a report this year **unless** the disclaimer that they reported in the past no longer applies OR the link to your disclaimer has changed. Rather, those agencies should provide a current point of contact for the Bulletin and the current URL to the disclaimer.**

"based on the review it has conducted, the [AGENCY] believes that it does not currently produce or sponsor the distribution of influential scientific information (including Highly Influential Scientific Assessments) within the definitions promulgated by OMB. As a result, at this time the [AGENCY] has no agenda of forthcoming influential scientific disseminations to post on its website in accordance with OMB's Information Quality Bulletin for Peer Review."
