

Monthly Progress Reports

The Commission directs the staff to report to the Commission, in connection with the midyear adjustments to the FY 2016 operating plan, an estimate of the cost of providing for the electronic submission of monthly progress reports when required as part of a corrective action plan. If the staff believes that other, related projects must or should be undertaken at the same time as the conversion to electronic filing for monthly progress reports, the staff should describe the related projects, explain the need or benefits of such projects, and provide a separate estimate of the cost and any additional cost that would be incurred by postponing such projects.
