20-F-00016	I am requesting data on product recalls, violations and import rejections to study a project on substandard goods in international trade. For the recall and violation data, I would like to append the current data at " https://cpsc.gov/Recalls " and " https://cpsc.gov/Recalls/violations " with the exact shipment line(s) that delivered the product. In particular, I'm interested in the value of the good on import, the corresponding hs-10 code, the foreign manufacturer/exporter name and address, port of entry/exit, and the date of import, or as much as you can provide. I'd also like the supplement the violations data with datapoints of products that are non-compliant firms to the LoA that had not voluntarily completed corrective action to remedy the hazard. For the Import Refusal Data, I hope to get something along the lines of " https://datadashboard.fda.gov/ora/cd/imprefusals.htm ", however, appended with again value of the good on import, the corresponding hs-10 code, the foreign manufacturer/exporter name and address, port/method of entry, and the date of import. Furthermore, I'd like information on the entry line, such as risk score, whether the line is screened, sampled, found violations, and seized, and the corresponding issues that were found. Finally, If possible, I would like to understand the formulae for the computation of Risk Assessment Methodology score, as well as any other institutional documents on how exactly a shipment line goes through the process of inspection and refusal. If there something in the data that violates personal privacy or national security in any way please let me know. I also have access to very secure data rooms: http://www.nber.org/help/localhelp/NBER_Data_Security.pdf . Of course, any privacy laws and nondisclosure acts would be guaranteed.
