Safety at Home

Hair Dryers

Don’t have an immersion-protection device on your hair dryer? Don’t use it. Report the hair dryer to CPSC at www.SaferProducts.gov.

Immersion-protection devices are required. They protect you from electrical shock and electrocutions.

Report product incidents and injuries to CPSC: SaferProducts.gov (800) 638–2772 or (301) 595–7054 (for deaf or hard of hearing individuals and/or individuals with speech and language disorders).
