

Home Safety Tips During #Coronavirus: *Outdoor Repairs*

POWER TOOLS

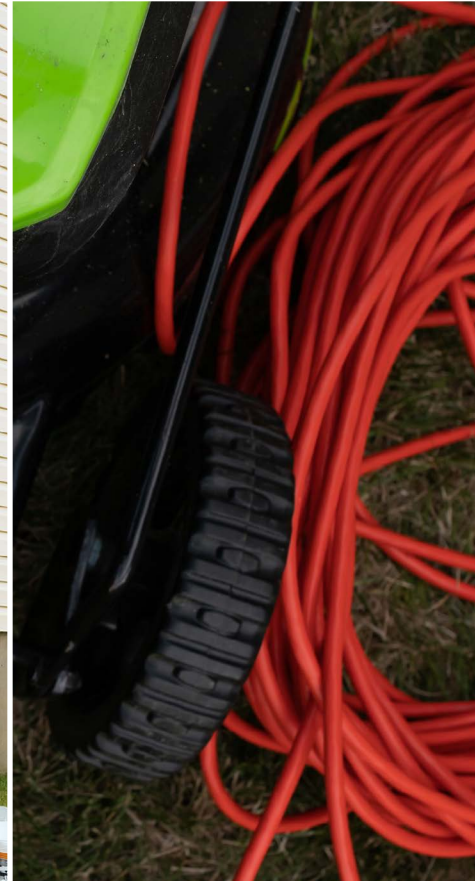

- To protect my eyes from flying debris, I always wear safety goggles when using power tools.

LADDER SAFETY

- I am taking precautions so I don't fall. I always make sure to have a helper hold the bottom of the ladder, and I position the ladder so that it is away from power lines before I climb.

ELECTRICAL

- When using extension cords outdoors, I make sure cords are undamaged, clearly labeled for outdoor use, and plugged into proper, grounded receptacles.

DECK SAFETY

- I have my deck professionally inspected to make sure it's structurally sound, to prevent a deck collapse.
