

MEETING LOG

SUBJECT: ISO/TC229 WG3 (Health, Safety and Environment) AWI TS 5265 Meeting Log

FY26 OP PLAN ENTRY: Nanotechnology

DATE OF MEETING: 8/5/2026

LOCATION OF MEETING: Virtual

CPSC STAFF FILING MEETING LOG: Matthew Cho (HSTR)

FILING DATE: 8/11/2026

CPSC ATTENDEE(S): Matthew Cho (HSTR)

NON-CPSC ATTENDEE(S): Contact ANSI for the full attendee list.

Summary of Meeting:

- On August 5, 2026, ISO/TC 229 WG3 convened virtually to review the status of Project Group (PG) 37, ISO/AWI TS 5265, "Method for characterizing and quantifying nanomaterials released from wood products."
- The project leader was absent; the Chairman for ISO/TC 229 WG3 chaired the meeting in their place.
- The Chairman inquired whether CPSC staff could assume project leadership if the current leader is unable to continue. The staff tentatively accepted, pending discussion with management.
- The group requested that the Chairman and ANSI staff contact the current project leader to confirm their ability to continue leading the project; the Chairman and ANSI staff agreed to follow up.
- A participant commented that the draft contains sufficient technical information but requires improved organization for clarity. Questions were raised regarding the project timeline, and it was suggested that technical experts should lead the project.
- ANSI staff noted significant delays and proposed extending the project timeline.
- The Chairman stated that the group will reconvene to discuss project status and direction, possibly in October 2026.
- ANSI staff will formally request an extension of the project timeline.

Next Steps:

ANSI-accredited US TAG to ISO/TC 229 Nanotechnologies meeting will be held, to discuss the preparation for the upcoming ISO/TC 229 Plenary Meeting, in Washington DC from September 22 to 23, 2026. The ISO/TC229 Nanotechnologies Plenary meeting will be held in Queretaro, Mexico October 19 to 23, 2026. Staff plans to attend both meetings virtually.
