

**LOG OF MEETING
DIRECTORATE FOR ENGINEERING SCIENCES**

SUBJECT: ISO/TC 310 technical committee on child care articles WG1

DATE OF MEETING: 10 January 2023

PLACE OF MEETING: Virtual (teleconference)

LOG ENTRY SOURCE: Celestine Kish (ESHF)

COMMISSION ATTENDEES: Celestine Kish, ESHF

NON-COMMISSION ATTENDEES: Contact ANSI for attendee list.

SUMMARY OF MEETING:

The ISO child care WG1 will work on general & common safety specifications for chemical and mechanical hazards. Due to the volume of issues, the WG discussed hazard priorities focusing on:

1. Mechanical & Thermal
2. Chemical
3. Product Information

The WG decided to have internal task groups for the three items noted above.

There was lengthy discussion on goals for the WG, specifically if the WG should produce Technical Specification guidance or Standards. The WG decided to work toward Standard development, but if agreement is not achieved, will use the working document as technical guidance.

The next meeting is tentatively scheduled for June 8, 2023 (virtual).
