

Fire Safety for Multigenerational Families

- There are about 4.3 million multigenerational households in the United States.
- Each year, there are about 360,000 home fires leading to roughly 2,500 deaths.*
- Practice these simple steps to keep family members of all age groups safe. **NFPA data*

Create an escape plan.

Include everyone in the home in the plan.

Practice your escape drill 2 times a year.

Consider children, older adults and people with disabilities in the plan.

**BEEP!
BEEP!
BEEP!**

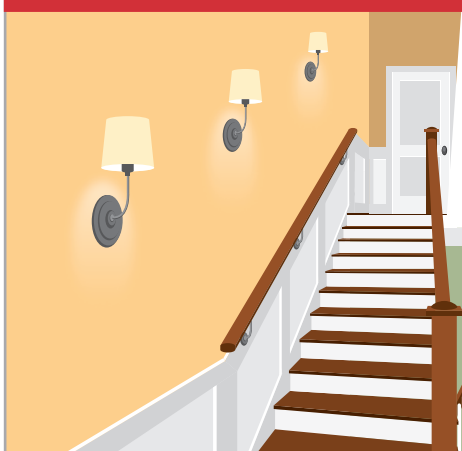

Have working smoke alarms.

Use alert devices to help family members who are deaf or hard of hearing.

Maintain bright lighting in the home.

Choose clear and safe exits. Keep pathways free from clutter.
