

MEETING LOG

SUBJECT: UL Standards Technical Panel (STP) for Software Cybersecurity for Network-Connectable Products (Internet of Things/Connected Products), Part 1: General Requirements, STP 2900-1.

LOCATION: Teleconference call

DATE: October 5th, 2022

LOG ENTRY SOURCE: Simon Lee, Jr., Electrical Engineering and Fire Sciences (ESEF)

COMMISSION ATTENDEES:

Simon Lee, Jr., ESEF

NON-COMMISSION ATTENDEES:

For a complete list of attendees, please contact Caroline Treuthardt at UL.

MEETING SUMMARY:

This UL 2900-1 STP meeting continues previous work from the last STP meeting in August-September and various Task Group meetings from last September. The STP meeting's main objective was to present and discuss the previous TG 1 and 2 developed proposals.

TG 1's objective was determining whether if various glossary terms needed expansion, or not. The term Credential's definition was presented and discussed for various questions and conditions. CPSC staff presented definitions from the online NIST Computer Security Resource Center (CSRC) Glossary and the Consumer Technology Association (CTA) ANSI/CTA-2088 to aid in the discussion. The STP provided revised language to capture the agreed upon new definition details. Clause 8.3 was also edited and agreed by the STP.

TG 2's objective was to redraft Section 4.1 and present to the STP for review. Specific items for discussion included topics such as: Details of which software source code and their configurations could be provided for testing and product testing boundaries. CPSC staff asked who would determine the product boundary and an STP member responded that anyone in the Supply Chain (Developer, tester, etc.) could potentially define that product testing boundary. The STP then agreed and incorporated the new changes in the notes for this section.

NEXT STEPS:

TG 3 and 4 were still reviewing their objectives, briefly updated the STP on their progress and will present their proposals at the next STP meeting. TG 3 is reviewing Section 12 and TG 4 is reviewing Sections 17-19 for further clarifications and revisions. A Doodle Poll will be circulated to determine the next STP 2900-1 for review of those remaining TG proposals.
