## About the Consumer Product Safety Commission

The U.S. Consumer Product Safety Commission (CPSC) was established in 1972 as an independent federal regulatory agency and is charged with protecting the public from unsafe consumer products. CPSC has jurisdiction over some 15,000 types of consumer products such as power tools, furniture, and toys, and recreational activities such as baseball and hiking.

CPSC uses a public health approach for the prevention of fatal and nonfatal injuries, including education, enforcement, and engineering strategies. CPSC works to reduce the risk of injuries and deaths from consumer products by developing voluntary standards with industry; issuing and enforcing mandatory standards; banning consumer products if no standard would adequately protect the public; obtaining the recall of products and arranging for their repair, replacement, or a refund; conducting research on potential product hazards; and informing and educating consumers through the media, state and local governments, private organizations, and by responding to consumer inquiries.

## About the National Electronic Injury Surveillance System

The primary purpose of the National Electronic Injury Surveillance System (NEISS, pronounced “nice”) is to provide timely data on unintentional consumer product-related injuries and deaths occurring in the U.S. NEISS injury data are gathered from the emergency departments (ED) of 96 hospitals selected as a probability sample of all U.S. hospitals with 24-hour EDs and at least 6 inpatient beds. Each participating NEISS hospital is hand-selected by CPSC because it provides an important representation of all other hospitals of its size and unique characteristics in the U.S.

Since 1972, NEISS data have enabled CPSC analysts to make timely national estimates of the number of injuries associated with (not necessarily caused by) specific consumer products and recreational activities within the jurisdiction of CPSC. Since 1978, CPSC has assisted other federal agencies by collecting data of special interest through NEISS. This allows other agencies to quickly and easily gather critically needed national data without the investment in personnel, time, and funding that designing, implementing, and executing an independent special survey would require. NEISS serves as a model for surveillance systems that collect injury data around the world.

Information gathered from NEISS, together with data from other CPSC sources, guides the CPSC in setting priorities for further study and also may provide the CPSC with evidence of the need for product recalls or bans, public safety standards, and public awareness campaigns.

## NEISS Changes and Enhancements

Occasionally, CPSC staff alter NEISS operational data collection and coding rules to accommodate the needs of other federal agencies or to reflect decisions about which consumer products fall under CPSC's jurisdiction. Over time, CPSC staff have modified the definitions of NEISS variables collected. For example, product codes have been added, deleted, combined, or split into two or more codes. This is especially important as new consumer products continually emerge into the U.S. market.

In 2000, CPSC, in partnership with the Centers for Disease Control and Prevention (CDC), expanded NEISS to collect data on all injuries and this expanded system became known as NEISS- All Injury Program (AIP). With the expansion to NEISS-AIP, NEISS became an even more important public health surveillance tool for other federal agencies and a variety of users in the U.S. and around the world. The expanded system, which is implemented **in a subset of NEISS hospitals**, includes data collection on both unintentional and intentional (e.g., assaults, suicides) injuries, including those that do not involve a consumer product under the jurisdiction of CPSC.

**NOTE: Your hospital is not collecting data under NEISS-AIP.**

In 2018, NEISS had its first major update since the NEISS-AIP expansion. In addition to formatting changes, the following major changes were made: (a) Diagnosis 2 and Body Part 2 variables were added; (b) Product 3 variable was added; (c) Ethnicity variable was added; (d) Drugs/Medication and Alcohol use variables were added; and (e) the allowable length and requirements of the narrative comment were changed. These changes were fully implemented on January 1, 2019.

In 2021, an additional code for recording Sex as 3-Non-Binary went into effect. This allowed the hospital to report the patient's sex as it is recorded in the ED record and included non-binary, intersex, and other designations that may appear in the ED record. Guidance was given to code transgender patients as 1-Male or 2-Female based on how patients presented on examination.

In 2023, the Sex variable was renamed Gender and gender code 3 was redefined as 3-Gender Diverse & Intersex. Gender code 3 was also updated to include all gender identities under the diverse umbrella including, but not limited to, gender non-conforming, transgender, non-binary, and other designations that may appear in the ED record.

## About this NEISS Coding Manual

This coding manual will assist the NEISS coder in determining when and how to code NEISS cases in the PC-NEISS system. The PC-NEISS system is only available on the CPSC-issued laptop computer(s) provided to each NEISS hospital. For detailed instructions about the PC-NEISS software, including instructions for uploading data, please see the *PC-NEISS User Manual* available on the Desktop of the CPSC-issued laptop computer. CPSC staff will also provide you a hard copy of the *PC-NEISS User Manual* upon request.

NEISS data users rely on coding that is consistent and easy to understand. Compliance with this guidance will enable CPSC to conduct improved quality control of data submitted.

Questions about this manual or the NEISS program can be emailed to [NEISScoders@cpsc.gov](mailto:NEISScoders@cpsc.gov).

## Important Definitions

### **Consumer Product**

A consumer product is defined as any article, or component part thereof, produced or distributed for sale to or use by a consumer in or around a home, school, in recreation, or otherwise (U.S. Government Accountability Office, 2014). While CPSC has jurisdiction over some 15,000 types of products, some consumer products fall outside the jurisdiction of the CPSC (e.g., alcohol, licensed motor vehicles, drugs, cosmetics, firearms). A comprehensive list of consumer products that NEISS coders are likely to encounter is located in the alphabetical reference in this coding manual. Product codes that are underlined in the alphabetical reference are consumer products or other objects that fall outside of CPSC jurisdiction.

### **External Cause**

In medicine, an external cause is a reason for the existence of a medical condition which can be associated with a specific object or acute process that was caused by something outside the body. *External causes of injury* are critical for understanding an injury event. In this coding manual, we may refer to an event as having an external cause of injury rather than an actual injury. This is because NEISS coders will encounter reportable cases where an external cause of injury was present (e.g., *bicycle crash*), but where there is no noted injury diagnosis.

### **Injury**

Injury is defined as any unintentional (i.e., unplanned) or intentional damage to the body resulting from acute (i.e., excessive) exposure to thermal, mechanical, electrical, or chemical energy or from the absence of essentials such as heat or oxygen (CDC, 1989). Injuries typically occur during a brief period of time or during a single, instantaneous event. Injury includes trauma from motor vehicle crashes, falls, poisoning, burns, suffocation, and drowning. Injury may be fatal or nonfatal. (Christoffel, 1999)

## NEISS Data Reporting Process

The success of NEISS depends upon adequate documentation by medical providers in the ED, correct identification of reportable cases by a NEISS coder, and accurate coding of all reportable cases by a NEISS coder. Every case coded must include information about the patient, the incident (*i.e.*, who, what, why, where, when, how), the injury and any product(s) associated with the injury. Because the cases a NEISS hospital reports are used to develop national estimates, just one case reported by a NEISS hospital represents up to 50 cases of a similar kind nationally. Before coding for NEISS, the coder must be formally trained by CPSC staff.

The data collection process begins when a patient is registered in the ED of a NEISS hospital. ED staff members elicit critical information as to how the injury occurred and document that information in the patient's medical record. It is important that NEISS coders work closely with ED staff to ensure that documentation is adequate.

Each day or every few days, a NEISS coder reviews all ED records for a treatment date (*i.e.*, date of ED visit), and codes each case that meets the criteria for inclusion in NEISS. The NEISS coder abstracts pertinent data from the selected ED record and transcribes it as coded variables and a brief narrative comment as a NEISS case in a CPSC-supplied laptop computer using rules described in this coding manual.

Following completion of NEISS data entry each day, the NEISS coder submits cases to CPSC using a secure, encrypted Internet transfer system. Once transmitted, NEISS data undergoes several reviews and data checks before the data is finalized. The CPSC analytical process begins on the same morning the NEISS data are collected. Analysts at CPSC check data for quality control and screen cases for potential emerging hazards. It is essential that each case reported be as complete and accurate as possible.

## Reviewing Hospital Records

The NEISS coder must screen **every** ED visit for inclusion in NEISS by reviewing each patient medical record. This screening process should occur for each treatment date and by calendar day order. Treatment days should never be skipped. The coder must review all visits that result in the creation of an ED record, regardless of whether the patient was treated and released, left without being seen, was admitted to the hospital, or was transferred to another hospital. **When more than one coder is coding for NEISS, it is important that the coders coordinate their coding so that treatment dates are not duplicated or skipped.** It is very important that the NEISS coder ensures that records of all patients seen in the ED are reviewed. NEISS coders must ensure that they maintain access to the records of all patients that were seen in the ED, such as admitted patients, deceased patients, trauma patients, transfer patients, burn center patients, etc. In some NEISS hospitals, populations of patients may be lost from the ED log once a transfer to another part of the hospital occurs. Be aware that some places of emergency care may be physically separate from the main ED in the hospital. For example, consider visits for emergency care to both adult and pediatric EDs and urgent care tracks in the ED.

## Determining Reportable Cases

### ***Do Report***

Thoroughly review the ED record prior to determining if the ED visit is reportable. Never rely solely on the ED log, chief complaint, reason for visit, or final diagnosis to make this decision. At a minimum, always review the history of present illness, diagnosis/clinical impressions, assessment, care plan, discharge report, and discharge instructions. Other sections such as the nursing notes, physical exam, labs results, radiology reports, etc., will be helpful in certain situations (*e.g.*, if there isn't enough detail about the physical injuries elsewhere, to look up alcohol test results, or gather additional information for a special study). Charting practices vary across hospitals, and the NEISS coder may find that some of these other sections always need to be reviewed for relevant details.

The following types of ED visits **should** be reported to NEISS:

- All **unintentional, not work-related**, fatal and nonfatal **injuries** associated with a consumer product or recreational activity within **CPSC jurisdiction** (includes ED visits with an **external cause** of injury noted, regardless of diagnosis).
- Assaults and suicide attempts when the victim(s) and perpetrator(s) are both ages 12 years old and younger.
- **Illnesses, allergic reactions, and symptoms** when the **onset** is associated with a consumer product, sport, or recreational activity within **CPSC jurisdiction** and that are not work-related.
- Although **dermatitis and conjunctivitis** have an assigned diagnosis code (74), they are considered illnesses (not injuries). Report dermatitis and conjunctivitis when the onset is associated with a **consumer product, sport, or recreational activity** within CPSC jurisdiction and that are not work-related.
- Injuries associated with hot water, carbon monoxide, and gas fumes or vapors, even when the source is unknown. Injuries associated with house or mobile home fires, even if no consumer product within CPSC jurisdiction is identified.
- All ED visits that otherwise qualify for a Special Study (see Special Study Appendices) including:
- All **poisonings (ingestions) and chemical burns** to children **less than 5 years** of age (*i.e.*, associated with drugs, medications, or any other substances);
- All injuries involving **firearms** or **personal protective equipment** (*e.g.*, pepper spray)

Examples of reportable cases involving injuries or external causes of injury (*i.e.*, injury events): falls associated with a product within CPSC jurisdiction (*e.g.*, toys, stairs, floor) even without an injury diagnosis (*e.g.*, well child check)

- injuries that occur while participating in sports or recreational activities, including heat exhaustion, heatstroke, sunstroke, and sunburn;
- injuries associated with bicycles, even if a motor vehicle was involved;
- injuries associated with stairs, ramps, floors, walls, elevators, escalators, *etc.*, wherever available for use by consumers;
- injuries that mention any kind of infant or nursery equipment;
- injuries associated with toys and games;
- injuries that result from fires of fabrics, household goods, home heating and cooling equipment, *etc.*;

Examples of reportable cases involving illnesses, allergic reactions, and symptoms:

- rashes or itching after use of new laundry detergents, soaps, or household cleaners;
- rhabdomyolysis after heavy weightlifting;
- nausea and vomiting during exercise on a treadmill;
- carpal tunnel syndrome after swinging a hammer all week to build a deck;
- asthma attack that started while playing basketball;

If a patient visits the ED multiple times for the same incident, the incident must only be reported **one time**. If new information becomes available with a subsequent visit, the NEISS coder should update the information in the NEISS record for the first visit rather than create a new NEISS record (*e.g.*, patient returns to the ED with cellulitis several days after previous ED visit for a laceration after cutting a finger with a kitchen knife).

If a patient returns to the ED (even on the same treatment date) for a new incident **unrelated** to the first incident, each of the visits must be coded separately (*e.g.*, patient broke his wrist last week playing basketball, and comes in today because he tripped and hit his cast against a door).

For patients that frequent the ED, all visits are reportable whenever they appear to be distinct incidents (*e.g.*, person returns to ED second night in a row for a second fall to the floor).

### ***Do Not Report***

The following types of ED visits **should not** be reported to NEISS:

- Transfers from any hospitals in the U.S. or its territories;
- Repeat visits for the same event;
- Injuries or ED visits with external causes of injury **without** a consumer product involved (e.g., fell to ground, fell on curb, hit by rock);
- Injuries or ED visits with external causes of injury associated **only with** products outside of CPSC jurisdiction and that do not qualify for a special study. This includes cases involving only:
  - automobiles and motorcycles;
  - trains, boats, and planes;
  - food;
  - local government equipment or fixtures (e.g., fire hydrants, telephone poles, traffic signs, commercial mailboxes, sidewalks, streets);
  - illegal drugs; and
  - medical devices.
- Illnesses, allergic reactions, and symptoms associated **only with** products outside of CPSC jurisdiction and that do not qualify for a special study;
- Injuries associated with parts of products where the product is unknown (e.g., piece of broken glass, piece of metal);
- Complications of medical/surgical procedures;
- Injuries associated only with alcohol, drugs, medicines, cosmetics, or pesticides to people age 5 and older;
- Intentional injuries, such as assaults and suicide attempts (**unless** the case otherwise qualifies for the firearms special study, or when the victim(s) and perpetrator(s) are both ages 12 years and younger).
- Injuries that occur while working (**unless** the case otherwise qualifies for the firearms special study).
- Injuries or illnesses from plants (**unless** the onset is associated with a consumer product or recreational activity (e.g., hiking, running) within CPSC jurisdiction).
- ED visits associated **only** with products listed as “Do not report” in the alphabetic listing of the coding manual.

Examples of ED visits that typically are **not reportable** include:

- poison ivy after weeding in the garden without mention of a CPSC product;
- laceration after stepping on a piece of broken glass from an unknown source;
- vomiting after eating at a restaurant;
- child strapped into a car booster seat in a car that was rear ended.

## Coding Instructions by Variable

Review and code cases in order of the date of treatment, unless otherwise directed by CPSC.

There is a section in this coding manual for each of the variables to be reported:

- Treatment Date
- Case Number
- Collection Date
- Comment
- Date of Birth (optional)
- Age
- Gender
- Hispanic (Ethnicity)
- Race
- Diagnosis 1 and 2
- Body Part 1 and 2
- Disposition
- Products 1, 2, and 3
- Alcohol
- Drugs/Medication
- Intent
- Location
- Fire Involvement
- Work-Related

## Treatment Date

(8 characters)

The treatment date is another name for the date of ED treatment. The date of treatment is usually recorded on a medical record at the time of registration (*i.e.*, entry to the hospital). The format for coding this variable is MM/DD/YYYY.

Examples:

Date of Treatment

Code

July 23, 2019

07/23/2019

January 1, 2020

01/01/2020

## Case Number

(8 characters - numbers only)

Each case reported to NEISS for a specific treatment date must have a unique case number. Letters of the alphabet may not be used. It is very important that the case number allows the coder to be able to find a case should CPSC have a question regarding the case.

<u>Example:</u>	<u>ED Case Number</u>	<u>Code</u>
	12345678	12345678

When a NEISS hospital uses more than eight digits for its case numbers, code only the LAST eight digits.

<u>Example:</u>	<u>ED Case Number</u>	<u>Code</u>
	956781234	56781234

Do not code any letters of the alphabet, which may appear in your hospital's case number. Substitute zeroes for any letters.

<u>Example:</u>	<u>ED Case Number</u>	<u>Code</u>
	EA123456	00123456

## Collection Date

The collection date is the date the NEISS coder codes the case. The collection date is determined automatically by NEISS and cannot be changed by the coder or CPSC staff.

## Comment

(up to 400 characters)

Every comment **MUST** comply with the following:

- **Age and gender** must be at the start of the comment (*i.e.*, 10YOM, 11MOF)
- If **twins** are involved in an incident, and both twins are patients that will be coded in separate NEISS cases, indicate "Twin A" or "Twin B" in the Comment just after the age. Similarly, if two non-twin patients with the same age and gender are involved in the same incident, mention "Patient A" or "Patient B" in the Comment just after the age.
- Be descriptive and include **pertinent details** about the incident (*i.e.*, who, what, why, when, where, how). Describe the sequence of events, products, fire involvement, alcohol/drug involvement, and the affected body part(s) in the middle of the comment.
- Use sentence case (*i.e.*, capitalize only the first word of each sentence and "DX:") and correct any spelling errors. The name and spelling of the product(s) must be correct.
- Include information about product **brand, manufacturer, and model** when known.
- Include the patient's **alcohol concentration/level** whenever alcohol use is associated with the incident. If the patient's alcohol concentration/level was not taken or recorded, the comment must state this.
- The **relevant clinician's diagnoses** should be at the end of the comment exactly as written in the ED record and denoted with "DX:". This abbreviation helps distinguish the clinician's diagnoses from other details about symptoms and complaints. If there are multiple diagnoses, separate them with punctuation marks. If there are no clinical diagnoses in the ED record, put "NO DX" at the end of the comment.
- Quote verbatim the words used within the ED record.
- Avoid abbreviations other than those described herein.
- If the NEISS coder uses a symbol as an identifier, that symbol should be the last character typed in the comment (NOTE: this is only necessary for coders that share computers).

Examples of comments following these guidelines:

- 60YOF woke up on floor, unsure if fell from bed or if woke up and fell, heavy alcohol use night before. 5cm laceration thru all subcutaneous layers. BAC 019. DX: laceration of forehead.
- 25YOM non-binary pt cut their hand when picking up broken glass from a bowl that dropped on the floor. DX: laceration of superficial palmar arch of right hand; laceration of left index finger without foreign body.
- 80YOF vacuuming when walking from bedroom to hallway and caught her foot on an extension cord, falling to floor and heard pop in hip. Admitted. DX: fall; left femoral neck fracture.
- 3YOM (twin A) and twin sibling got into a bottle of cough syrup, about half was left before incident. Pt drowsy, but no vomiting noted. DX: accidental drug ingestion
- 3YOM (twin B) and twin sibling got into a bottle of cough syrup, about half was left before incident. Pt vomited and is drowsy. DX: accidental drug ingestion

### ***Personally Identifiable Information (PII)***

Do not include **PII** such as names, birthdates, or addresses (e.g., street, city) in the Comment. If other people are associated with the incident, refer to the other person by their relationship to the patient (e.g., father, sister, classmate, neighbor).

### ***Patient Age and Gender in Comment***

Begin each comment with the patient's age and gender using "Y" for year or "M" for months, followed by "O" for old, and then "M" for male, "F" for female, or the Gender Identity as stated in the ED record. When the patient is intersex or their gender is a part of the gender diverse realm in the ED record, include the **exact description** from the ED record (i.e., do not simply use the word "other" in the comment). Never shorten 'Gender Non-Conforming' to GNC. Never Shorten 'Non-Binary' to NB, N-B, or N and B. 'Non-binary' may be shortened to 'enby' or 'enbie' if that is how it has been documented in the ED.

#### Examples:

<u>ED record:</u>	<u>Coded Age</u>	<u>Coded Gender</u>	<u>NEISS Comment:</u>
30-year-old male	30	1	30YOM
19-month-old female	219	2	19MOF
53-year-old intersex patient	53	3	53YO intersex pt
22-year-old non-binary patient	22	3	22YO non-binary pt
46-year-old transgender male	46	3	46YO transgender M

For very young infants, the age in the ED records may be listed in days or weeks. If reporting the age in days or weeks, use "D" for days and "W" for weeks.

#### Examples:

<u>ED record:</u>	<u>Coded Age</u>	<u>Coded Gender</u>	<u>NEISS Comment:</u>
7-day-old female	201	2	7DOM
3-week-old male	201	1	3WOM

If the age or gender is unknown, use the following abbreviations:

#### Examples:

<u>ED record:</u>	<u>Coded Age</u>	<u>Coded Gender</u>	<u>NEISS Comment:</u>
Unknown male	0	1	Unk Age M
Unknown age & gender/sex	0	0	Unk Age/Gender
20-year-old unknown gender/sex	20	0	20YO Unk Gender

**Use of Abbreviations**

Abbreviations other than those described herein must be **avoided** whenever possible because data users cannot guess the meaning of most abbreviations whether they are the general public, medical professionals, media professionals, or researchers. Never abbreviate product names. **Uncommon or ambiguous abbreviations are not acceptable and cases with these abbreviations will be returned to the coder for correction.**

**Quote Information Verbatim from the Medical Record**

Quote verbatim the words used on the ED record. Use the exact wording from the ED record for products and clinical diagnoses. For example, do not reword humerus fracture as "arm fracture".

**Description of the Incident**

The Comment should include a description of what the patient was doing when the incident occurred (*i.e.*, the sequence of events), the product(s) involved, and the location where the incident occurred. Refer to the ED notes of the attending physician, nurse, triage staff, and other medical professionals for pertinent information. When available, include information about the use (or lack of) protective equipment and devices (*e.g.*, not wearing a helmet" or "smoke alarm sounded"). If the incident is intentional (*e.g.*, assault, suicide attempt, legal intervention), include this information in the Comment.

**Product Description and Brand Names**

**All products involved in the incident must be mentioned in the Comment field.** Please include the **brand name, manufacturer, and model** of any product associated with an injury whenever such information is available. **Product identification can never be too specific!** Remarks like "used crib from a garage sale" or "rental bicycle" are helpful in the absence of any other product identification. If there is conflicting information on the product(s) involved, include this information in the comment and code the products (*e.g.*, not clear if patient fell out of a bed versus chair).

**Alcohol Concentration/Level**

If the clinical documentation indicates the patient used alcohol, include the results of alcohol testing in the comment. Alcohol test results may be reported in different units at different hospitals (*e.g.*, 0.02%, 20 mg/dL, 0.20 g/dL). To avoid ambiguity when reporting the test results, start with the abbreviation for the alcohol concentration/level/breath test (BAC/BAL/ABT) and follow this with 3 digits without the decimal. The chart below lists examples of how to record the level as 3 digits in the comment.

ED Record			NEISS Comment
% by volume	g/dL	mg/dL	
0.020%	0.020	20	020
0.080%	0.080	80	080
0.160%	0.160	160	160
0.200%	0.200	200	200
0.300%	0.300	300	300
0.500%	0.500	500	500

**Date of Birth**

(8 characters-numbers only)

The date of birth is not required. However, the **Date of Birth** can be entered and the PC-NEISS software will then automatically calculate and insert the correct age of the patient based upon the treatment date. This feature is especially useful for calculating the correct age in months for children under 2 years old.

## Age

(up to 3 characters)

Enter the **age** of the patient on the **date of treatment**. A common mistake is to enter the age of the patient based on the current date instead of the treatment date. Hospital medical records systems automatically update the age based on the current date, so if a patient has a birthday between the treatment date and the date the NEISS coder reviews the case, the age in the medical record may not reflect the age of the patient on the date of treatment. To avoid this mistake, the NEISS coder may enter the Date of Birth instead, and the PC-NEISS software will automatically calculate the correct age.

For children under two years old, record the age in completed months (e.g., code the age of infants who are four to seven weeks old as one month). Ages between birth and two years are entered in months because small differences in age represent greater variation in motor, speech, and cognitive abilities. To show that the age is in months instead of years, put a "2" in the first space of the age code. Code the age of infants who are less than one month old as one month ("201").

<u>Examples:</u>	<u>Age</u>	<u>Code</u>
	Three weeks	201
	Four weeks (one month)	201
	Seven weeks	201
	Ten weeks	202
	Nine months	209
	Twelve months (one year)	212
	Eighteen months	218

For patients two years of age or older, record the age in years. For a patient 115 years of age or older, record the age as 115 and indicate the actual age in the Comment. If the medical record indicates the patient was born on January 1, 1900, please verify the patient's age with hospital staff – some hospitals use this date when the patient's age is unknown. For a patient whose age is unknown, record the age as zero (0).

<u>Examples:</u>	<u>Age</u>	<u>Code</u>
	Two years	2
	Eight years	8
	Forty-five years	45
	One hundred years	100
	One hundred two years	102
	Unknown	0

**Always ensure that the age coded in the variable and the age in the comment agree before submitting data to CPSC!**

## Gender

(1 character)

Report the patient's gender as it is recorded in the ED record. Gender identity should be coded as priority over sex as recorded in the medical record when available. Where gender identity information is available in the patient records, code the affiliated gender identity as Gender. If the only information available is the patient's sex assigned at birth, that information should be coded as Gender.

Use Gender code 3, Gender Diverse & Intersex, when the patient is identified as intersex or their gender identity is available and falls within the realm of gender diverse. Gender diverse includes but is not limited to: transgender; transgender male or female-to-male (ftm); transgender female or male-to-female (mtf); genderqueer; gender non-conforming; bi-, tri-, pan-, poly- and/or omni-gender; gender fluid; non-binary; enby or enbie; agender; genderless; gender void; and culturally specific gender identities such as Two-Spirited, Fa'afafine, Hijras, Khanith, *etc.* This list is not exhaustive.

Recorded Gender in ED Record	Code
Male	1
Female	2
Gender diverse & intersex encompasses but is not limited to all of the following identities: transgender, male to female; transgender, female to male; transgender, gender nonconforming; gender fluid; genderqueer; polygender/pangender; omnigender; non-binary; bigender; agender; Two-spirit identities; Fa'afafine; Hijras; Khanith; intersex.	3
Not recorded/Unknown	0

In the following examples, use Gender code 3, Gender Diverse & Intersex:

- 21yo transgender male was playing soccer, tripped and fell onto right ankle. DX: ankle sprain
- 32yo intersex pt brought in by family for altered mental status, urine drug screen positive for opiates & barbiturates, BAL 140. DX: acute alcohol intoxication, severe alcohol disorder
- 56yo Two-Spirited pt sustained burn injuries after pants caught fire in outdoors fire pit. DX: burn to right thigh

## Hispanic?

(1 character)

The Hispanic variable is a variable that indicates ethnicity. Report Hispanic? as 1-Yes when the ED record indicates the patient is Hispanic, Latino/Latina, or of Spanish origin. Hispanic ethnicity includes people of Cuban, Mexican, Puerto Rican, South or Central American, or other Spanish culture or origin regardless of race. If a medical record does not indicate an ethnicity, one should not be assumed based upon factors such as last name of the patient.

If the ED Record ...	Then Code
indicates the patient <b>is</b> a person of Hispanic, Latino/Latina, or Spanish origin.	1-Yes
indicates the patient <b>is not</b> a person of Hispanic, Latino/Latina, or Spanish origin.	2-No
<b>does not indicate</b> whether the patient is of Hispanic, Latino/Latina, or Spanish origin.	0-Unknown

## Race

(1 character)

Report the patient's race as it is recorded in the ED record. Use the codes below to classify the patient's race based on information in the ED record. When the race is stated in the ED record, and you cannot identify which of the race codes to use, refer to Appendix G for additional information. If Appendix G does not include the suggested race code, then select code 3-Other and enter the specified race in the Other Race text field (up to 15 characters).

Definition	Race Code
A person having origins in any of the original peoples of Europe, the Middle East, or North Africa.	1-White
A person having origins in any of the black racial groups of Africa.	2-Black/African American
Use this code when: (1) the ED record indicates <u>more than one race</u> (e.g., multiracial, biracial), (2) the race is stated in the ED record and none of the above applies, or (3) the race is stated as "Other" in the ED record with no other details.	3-Other (then enter race specified by ED record in the <b>Race Other</b> field)
A person having origins in any of the original peoples of the Far East, Southeast Asia, or the Indian subcontinent.	4-Asian
A person having origins in any of the original peoples of North and South America (including Central America), and who maintains tribal affiliation or community attachment.	5-American Indian/Alaska Native
A person having origins in any of the original peoples of Hawaii, Guam, Samoa, or other Pacific Islands.	6-Native Hawaiian/Pacific Islander
Use this code when: (1) there is <u>no information</u> in the ED record, or (2) the patient <u>refused</u> to provide this information.	0-Not stated

### *Examples of coding the Hispanic and Race Variables*

Race/Ethnicity in the ED Record	Hispanic	Race	Race Other
White Hispanic	1	1	
Black Hispanic	1	2	
Cambodian	0	4	
Alaskan Indian	0	5	
Samoan, Not Hispanic	2	6	
White/Black	0	3	White/Black
Puerto Rican	1	0	
"Other Race", but the other race is not specified	0	3	Unknown
Race is only listed as Hispanic, and there is no other information about race	1	0	

## Diagnosis 1 and 2

(2 characters each)

Diagnosis 1 **must always be coded**. Diagnosis 2 is coded if there is more than one diagnosis. As a reminder, all diagnoses coded must also be noted in the Comment field.

There are 30 NEISS diagnosis codes and each code is 2 numerical characters. A summary of the 30 NEISS diagnosis codes follows and may also be found in Appendix D. Appendix B contains a list of NEISS injury diagnosis codes for the diagnoses that NEISS coders are likely to encounter in ED medical records.

Diagnosis	Code
Amputation	50
Anoxia	65
Aspirated foreign object	42
Avulsion	72
Burns, scald (from hot liquids or steam)	48
Burns, thermal (from flames or hot surface)	51
Burns, chemical (caustics, <i>etc.</i> )	49
Burns, radiation (includes all cell damage by ultraviolet, x-rays, microwaves, laser beam, radioactive materials, <i>etc.</i> )	73
Burns, electrical	46
Burns, not specified	47
Concussions	52
Contusions, Abrasions	53
Crushing	54
Dental injury	60
Dermatitis, Conjunctivitis	74
Dislocation	55
Electric shock	67
Foreign body	56
Fracture	57
Hematoma	58
Hemorrhage	66
Ingested foreign object	41
Internal organ injury	62
Laceration	59
Nerve damage	61
Poisoning	68
Puncture	63
Strain or Sprain	64
Submersion (including Drowning)	69
Other/Not Stated	71*

\*When Diagnosis - 71 (Other/Not Stated) is entered in PC-NEISS, the cursor will tab to a required "Diagnosis Other" field. The NEISS coder is required to enter a text string (up to 50 characters) describing the diagnosis verbatim as it is described in the ED medical record.

#### ***Finding the Diagnosis in the ED Record***

The **attending physician's or other clinical provider's notes** should be used as the basis for selecting the appropriate diagnosis code(s) for NEISS. Start with the clinical diagnoses, but also use other clinical documentation to code all physical injuries documented by clinical providers. Diagnosis information is usually found in the clinician's notes but may be found in other areas of the ED record and may also be referred to by other names (e.g., discharge summary, nursing notes, clinical impression, final diagnosis).

Please note that **a diagnostic word used by a medical provider at a hospital may not be the same word used in NEISS**. Carefully review the [Discussion of Selected Diagnoses](#) section to learn how code Diagnosis 1 and Diagnosis 2 for a variety of common scenarios.

Examples:

<u>Clinician's diagnosis</u>	<u>NEISS diagnosis code</u>
carbon monoxide poisoning	65 Anoxia
Inhalation injury from bleach fumes	68 Poisoning
foreign body trachea	42 Aspiration
anoxic brain injury due to near drowning	69 Submersion

If the clinician's diagnoses are non-specific (e.g., "DX: facial injury", "DX: pain"), and more specific information is available from other medical personnel (e.g., nursing notes document 5cm laceration on the right cheek), then use the specific information to determine the NEISS diagnosis code(s).

Example:

37YOF states she stepped on a shard of broken wine glass yesterday and has 4cm laceration to right heel. Dx acute foot pain  
Diagnosis 1: 59-Laceration                      Body Part 1: 83-Foot  
Diagnosis 2: -                                      Body Part 2: -

If the clinician's diagnoses are not available, then use diagnostic information provided by other medical personnel (e.g., radiologist, physician's assistant, nurse). If the record contains no diagnoses by medical personnel, review the patient's complaint and the treatment(s) given to choose the most appropriate diagnoses.

It is important to keep in mind that all fatal and nonfatal **injury events involving CPSC jurisdiction consumer products or recreational activities** are reportable, regardless of diagnosis. If the ED record indicates that there was an external cause of injury (e.g., fall down stairs, bicycle crash) and there was **no associated injury or diagnosis recorded in the ED record**, the Diagnosis 1 code is 71, Other/Not Stated.

Example:

20YOM brought to ED after minor fall down 3 stairs at fraternity party. Denies LOC. BAL 230. DX: acute alcohol poisoning.  
Diagnosis 1: 71 – Other: "Not Stated"      Body Part 1: 87-Not Stated  
Diagnosis 2: -                                      Body Part 2: -

**Diagnosis Coding Priority**

Diagnosis 1 should always reflect the most severe diagnosis associated with the consumer product(s) or recreational activity(ies). If there are multiple diagnoses associated with the case, code the most severe as Diagnosis 1, the next most severe as Diagnosis 2, and list all of the diagnoses in the Comment. If there is no injury or diagnosis associated with case, Diagnosis 1 should be 71-Other.

Examples

23MOF got into a bottle of liquid detergent, drank some, vomited and is lethargic.

DX: Accidental poisoning

Diagnosis 1: 68-Poisoning

Diagnosis 2: -

Body Part 1: 85-All Parts of Body

Body Part 2: -

15MOM was found chewing on a flavored children's aspirin pill, sitting next to the bottle of pills, might be up to four missing. DX: Ingestion of aspirin

Diagnosis 1: 68-Poisoning

Diagnosis 2: -

Body Part 1: 85-All Parts of Body

Body Part 2: -

61YOF fell off bed onto floor, had been drinking earlier in the evening.

DX: Fall, Acute alcohol intoxication

Diagnosis 1: 71-Other: "Not Stated"      Body Part 1: 87-Not Stated

Diagnosis 2: -      Body Part 2: -

32YOM riding a bike home from the bar when he hit a parked car, not wearing helmet. DX:

Fractured right clavicle, Mild head injury, Alcohol intoxication

Diagnosis 1: 57-Fracture      Body Part 1: 30-Shoulder

Diagnosis 2: 62-Internal Organ Injury      Body Part 2: 75-Head

86YOF became dizzy, slipped on some water and fell to floor in bathroom, hip hurts. DX: Adverse reaction to blood pressure meds, right femoral neck fracture, Contusion to right cheek

Diagnosis 1: 57-Fracture      Body Part 1: 79-Lower Trunk

Diagnosis 2: 53-Contusion      Body Part 2: 76-Face

19YOM was high on PCP and punched through a window. DX: Substance abuse, Fracture 5<sup>th</sup> metacarpal, Multiple lacerations left hand

Diagnosis 1: 57-Fracture      Body Part 1: 82-Hand

Diagnosis 2: 59-Laceration      Body Part 2: 82-Hand

PC-NEISS software will not allow the coder to enter the same combination of Diagnosis Code and Body Part twice. Please remember to mention all diagnoses in the Comment.

Examples:

37YOM fell onto outstretched arms while riding a bicycle. DX: Fractured left radius and ulna.

Diagnosis 1: 57-Fracture      Body Part 1: 33-Lower Arm

Diagnosis 2: -      Body Part 2: -

11YOM was playing volleyball yesterday & fell onto outstretched arms, pain & swelling to both wrists. DX: fractures of bilateral wrists

Diagnosis 1: 57-Fracture      Body Part 1: 34-Wrist

Diagnosis 2: -      Body Part 2: -

***When Diagnoses Should Not Be Coded***

Some ED diagnosis should not be coded:

- Unrelated illness, comorbidity, or preexisting conditions (e.g., diabetes, urinary tract infection, flu).
- Symptoms of injuries (e.g., pain) where the injury is already coded for the same body part (e.g., when there is arm pain due to fractured arm, code the fracture only).
- Behavioral and mental disorders (e.g., depression, anxiety), suicidal ideation (e.g., thoughts, plans)

***Discussion of Selected Diagnoses in Alphabetical Order***

***Anoxia***

Use code 65, Anoxia, when the patient cannot obtain sufficient oxygen, either due to hampered breathing or lack of oxygen itself, and the anoxia is not due to poisoning, aspiration, or drowning. Code 65, Anoxia when:

- The diagnosis is strangulation, suffocation, or asphyxia.
- The patient inhaled products of combustion, such as smoke, soot, or exhaust (e.g., generator, heating appliance, or camping equipment).
- The patient was exposed to carbon monoxide (CO), methane, propane, or natural gas.

**Aspirated Foreign Object**

Use code 42, Aspirated foreign object, when an object is inhaled, blocking the airway, or is located in the respiratory tract (e.g., oropharynx, pharynx, larynx, trachea, or lungs). Commonly aspirated objects include beads, coins, and thumbtacks. If a patient aspirates on liquids, use 42, Aspirated foreign object, unless the aspiration was due to immersion, submersion or drowning. If a foreign object is in the nose, and there is any uncertainty whether it was aspirated or inserted, use 42, Aspirated foreign object.

Use this code when the only information in the ED record is that the patient “choked” or that an object is in the “throat” (e.g., in cases where the patient left without being seen or there are no relevant clinical details available).

**Avulsions, Contusions/Abrasions, and Lacerations**

Use code 72, Avulsions, for avulsions, avulsion lacerations, degloving, and skin tears. Use code 53, Contusions/Abrasions, for abrasions, bruises, contusions, ecchymoses, friction burns, scratches, and soft tissue injuries. Use code 59, Laceration, for lacerations and cuts. If a patient has a wound due to cutting, slashing, or slicing with a sharp object, and there is no other information, use 59, Laceration. **Exceptions:** Use code 57, Fracture, for avulsion fractures. Use code 62, Internal organ injury, for any injuries to the brain, abdominal organs, and thoracic organs (e.g., spleen laceration, cerebral contusion).

**Burn Injuries**

Try to get information about the kind of burn (chemical, electrical, scald, thermal, radiation). If the clinician's diagnosis is inadequate, the type of burn may be deduced from the kind of incident and product(s) involved.

<b>Scenario</b>	<b>Then Code:</b>
Burns from arcing, electrical products	46, Electric burn
Burns from cold (e.g., ice, frostbite, frostnip)	47, Burn not specified
Burns from hot water, hot liquid, or steam	48, Scald burn
Contact with acids, alkalis, or caustics	49, Chemical burn
Chemical ignited causing injury from resulting flames	51, Thermal burn*
Burns from flammable liquids that ignited (e.g., gasoline, kerosene, or lighter fluid)	51, Thermal burn*
Burn caused by touching a hot surface	51, Thermal burn
Burn caused by exposure to sun lamp	73, Radiation burn
Friction burns (e.g., “carpet burn”, “road rash”)	53, Contusions/Abrasions
Pulmonary burns	62, Internal organ injury

\* For all thermal burns, the Comment should make it clear whether the burn came from flames or a hot surface if the information is available.

**Choking**

Choking is a symptom. Do not assume that choking refers to aspiration. If there is any other information available in the ED record, use that information to choose the diagnosis code. Only use 42, Aspiration for choking when there is **no other** information available in the ED record (e.g., patient left without being seen). For example, if the only diagnosis is “choking”, but an x-ray indicates the object is in the esophagus, use 41, Ingestion.

**Dermatitis and Conjunctivitis**

If the dermatitis is due to contact with a substance, use diagnosis code 71, Dermatitis. If the dermatitis is due to ingestion of a substance, use diagnosis code 68, Poisoning. When coding 74 for diaper rash, use body part 79, Lower Trunk. When coding 74 for conjunctivitis, use body part 77, Eyeball.

**Foreign Body**

Use 56, Foreign Body when a solid object is embedded in the patient by force (e.g., splinter in arm) or otherwise attached to the patient's body (e.g., ring stuck on finger, hair tourniquet). If the foreign body is a liquid in the eye, use 71, Other/Not Stated instead. Do not use 56-Foreign Body for objects that enter the body through ingestion (41) or inhalation (42). If a foreign body is in the nose, and there is uncertainty whether it was aspirated or inserted, use 42, Aspirated foreign object.

**Head Injuries**

Code the most severe and specific diagnosis. A summary of diagnosis codes for common head injuries follows:

<b>Clinical Diagnosis</b>	<b>Diagnosis Code:</b>
Blunt force trauma to head	62, Internal Organ Injury
Cerebral contusion	62, Internal Organ Injury
Closed head injury	62, Internal Organ Injury
Concussion	52, Concussion
Hematoma to external head, includes cephalohematoma	58, Hematoma
Scalp laceration	59, Laceration
Skull fracture	57, Fracture
Subdural hematoma	62, Internal Organ Injury

If there are no specific diagnoses available for the head injury, use 62, Internal organ injury. For example, if the patient hit his head but left the ED before an ED diagnosis was recorded, use 62, Internal organ injury. However, if there are clinical diagnoses available, choose the diagnosis code based on those. For example, if the only clinical diagnosis available is "head pain", use 71, Other/Not Stated.

More than one type of head injury may be coded. For example, diagnoses of closed head injury and concussion are not mutually exclusive. If both diagnoses are listed in the medical record, then both should be coded.

**Infections due to Injuries**

If the clinician's only diagnosis is an infection due to an injury, also code the injury that led to the infection.

**Example:**

24yof lacerated foot when stepped on knife 2 days ago, now area around wound is red, swollen and painful. DX: cellulitis of left foot.

Diagnosis 1: 71-Other: Cellulitis

Body Part 1: 83-Foot

Diagnosis 2: 59-Laceration

Body Part 2: 83-Foot

**Ingested Foreign Object**

Use code 41, Ingested foreign object, only when BOTH of the following conditions are met:

- The patient has swallowed an insoluble, solid object; that is, an item that will not dissolve in liquid, *and*
- The swallowed object is not likely to cause poisoning.

Some commonly swallowed objects are coins, toy parts, buttons, nails, and crayons. The object may or may not have lodged somewhere in the digestive tract (e.g., esophagus, stomach, intestines). Use 42, Aspirated foreign object, if the object is in the respiratory tract (e.g., oropharynx, pharynx, larynx, trachea, or lungs). Occasionally, a patient will initially aspirate and then subsequently ingest a foreign object. If the clinician's diagnoses include both aspiration and ingestion, then code both the aspiration (42) and the ingestion (41).

Use this code when the only information in the medical record is that the patient "swallowed" something and there is no clinical information or evidence of aspiration or poisoning.

**Internal Organ Injuries**

Use code 62, Internal organ injury, for injuries to the brain, abdominal organs, and thoracic organs that are not due to aspiration or ingestion. This includes organ injuries described as contusions, lacerations, or hemorrhages (e.g., cardiac contusion, liver laceration, spleen hemorrhage). **Exception:** The diagnosis of “acute kidney injury” is not necessarily a result of a traumatic event, and may be caused by illness. If the acute kidney injury is due to drugs, use 68, Poisoning. If the acute kidney injury is due to crushing, use 54, Crushing. If a patient has acute kidney injury due to a blunt force trauma, use 62, Internal organ injury.

**Poisoning**

Use code 68, Poisoning, when the patient:

- **Swallowed** either a **liquid/soluble chemical or drug/medication**. Chemicals that may cause poisoning include liquids such as furniture polish, bleach, lighter fluid, paint, gasoline, and alcohol. Poisoning can also be caused by non-liquid household substances such as charcoal, powder detergents, toilet bowl cleaning tablets, spackling compounds, and solid room deodorizers. These substances are soluble (i.e., dissolve in liquid).
- **Inhaled vapors, fumes, or gases** (e.g., from chemicals, cleaners, or fuels). **Exception:** Use code 65, Anoxia, for inhalation of carbon monoxide (CO), smoke from fires, products of combustion (e.g., exhaust), natural gas, or methane.
- **Swallowed** either a liquid or soluble chemical or drug and had an “**allergic reaction**” (e.g., swelling, dermatitis, rashes, hives, urticaria, etc.).
- Had a **systemic reaction** from absorption of a product through the skin (e.g., non-cosmetic dyes, nickel jewelry).

**Submersion (including Drowning or Near Drowning)**

Use 69-Submersion for fatal and nonfatal injuries associated with drowning. This includes aspiration or ingestion of water while the patient is immersed in water (e.g., pool, tub, bucket).

**Other**

If none of the listed diagnoses in Appendix B is appropriate, use code 71, Other/Not Stated. Record the exact wording of the diagnosis from the ED record in the Diagnosis Other variable field.

**Probable/Possible/Rule Out/Differential Diagnosis**

If the medical record indicates that a diagnosis is “probable,” “possible,” “cannot be ruled out” (also indicated as “Rule Out” or “R/O”), etc. and there is no other diagnostic information available, then the unconfirmed diagnosis(es) should be coded. Unconfirmed diagnoses take priority over vague symptoms such as pain.

Examples:

17YOM riding a tandem bicycle with friend was struck by a car, not wearing a helmet. DX: possible mild traumatic brain injury.

Diagnosis 1: 62-Internal Organ Injury Body Part 1: 75-Head  
Diagnosis 2: - Body Part 2: -

59YOF was playing shuffleboard developed pain in back. DX: acute right lower rib contusion versus occult fracture.

Diagnosis 1: 53-Contusion Body Part 1: 31-Trunk, upper (rib)  
Diagnosis 2: 57-Fracture Body Part 2: 31-Trunk, upper (rib)

89YOF with dementia sent from nursing home to rule out head injury after suffered unwitnessed fall out of chair. DX: fall.

Diagnosis 1: 62-Internal Organ Injury Body Part 1: 75-Head  
Diagnosis 2: - Body Part 2: -

***When No Diagnosis is Available***

When there are no relevant physician's diagnoses, use other information in the ED record. The patient's chief complaint may be used if there is no other diagnostic information available (e.g., the patient left without being seen). If there is no information, Diagnosis 1 = 71, Other: "Not stated" may be used.

Sometimes the only information NEISS coders have about an injury is a clinical impression that is not easily translatable to a NEISS diagnosis code. The following examples are some of these common scenarios:

<b><i>Scenario</i></b>	<b><i>Then Code:</i></b>
Blister (not due to burn or chemical)	71-Other
Cut	59-Laceration
Fishhook injury	56-Foreign Body
Scratches	53-Contusion

## Body Part 1 and 2

(2 characters each)

Body Part 1 **must always be coded**. Body Part 2 is coded if there is more than one body part affected. As a reminder, all body parts coded must also be noted in the Comment field.

There are 26 NEISS Body Part codes. Refer to Appendix C for an in-depth list of body parts and corresponding NEISS Body Part codes. Appendix D includes a body part diagram as a quick reference. Appendix D will help you distinguish the boundaries between the body part codes (e.g., upper vs lower trunk). The body part codes are as follows:

Body Part Affected	Code
Arm, lower ( <u>not</u> including elbow or wrist)	33
Arm, upper	80
Ankle	37
Ear	94
Elbow	32
Eyeball	77
Face (including eyelid, eye area and nose)	76
Finger	92
Foot	83
Hand	82
Head	75
Internal (use with aspiration and ingestion)	0
Knee	35
Leg, lower ( <u>not</u> including knee or ankle)	36
Leg, upper	81
Mouth (including lips, tongue and teeth)	88
Neck	89
Pubic region	38
Shoulder (including clavicle, collarbone)	30
Toe	93
Trunk, lower	79
Trunk, upper ( <u>not</u> including shoulders)	31
Wrist	34
25-50% of body (used for burns only)	84
All parts of body (more than 50% of body)	85
Not recorded	87

If more than one Body Part is coded, Body Part 1 must correspond to Diagnosis 1 and Body Part 2 must correspond to Diagnosis 2. If more than one body part is associated with one diagnosis, code the body parts with the most severe injuries and mention all of the affected body parts in the Comments.

Example:

55YOF had a large pot of boiling water with noodles on the stove, tried to pick it up and dropped it because the handle was too hot. Water spilled on her arm, legs, and abdomen. 25% TBSA. DX: Second degree burns to right forearm and both thighs, First degree burns to abdomen.

Diagnosis 1: 48-Burns, Scald

Body Part 1: 33-Arm, Lower

Diagnosis 2: 48-Burns, Scald

Body Part 2: 81-Leg, Upper

When multiple diagnoses are represented by the same Diagnosis and Body Part code combination, the Diagnosis code and Body Part code combination should only be entered once.

Example:

68YOF at home cleaning up, backed up and tripped on open dishwasher door, falling backward and landing on left side. DX: fractured left radius and left ulna.

Diagnosis 1: 57-Fracture

Body Part 1: 33-Lower arm

Diagnosis 2: -

Body Part 2: -

### ***Discussion of Body Part Affected for Selected Injuries***

#### **Back Injuries**

For back injuries, determine whether the upper back (upper trunk/thoracic vertebrae, code 31), or lower back (lower trunk/lumbar vertebrae, code 79), was involved and code accordingly. Use the waist or navel as the dividing line to differentiate between upper and lower trunk. **If the diagnosis is simply “Back injury” and there is no other information in the ED record, use code 31, Upper trunk.** (Note: For cervical vertebrae, use Neck, code 89.)

#### **Burn Injuries**

If only one or two body parts were injured, code those body parts. Otherwise, code the two body parts with the most severe burns. If more than two body parts were injured, code the body parts with the most severe burns. **Only use body part codes 84, 85, and 87 when no specific body parts are mentioned in the ED record.** If no specific body parts are identified, but the percent of the body burned is stated (e.g., “18% TBSA”), then use one of the following:

- burns to less than 25% of the body: 87, Not stated
- burns to 25-50% of the body: 84, 25-50% of body
- burns covering more than 50% of the body: 85, All of body

#### **Extremity Injuries**

For arm and leg injuries, note the specific area of the arm/leg and code accordingly. If there is no other information in the ED record, code unspecified areas of the arm using 33-Lower Arm, and unspecified areas of the legs using 36-Lower Leg.

‘Upper extremity’ is a general term that may refer to the lower arm, upper arm, elbow, wrist, hand, or fingers. If the specific area of the upper extremity is known, state and code that as the body part. Otherwise, use 33-Lower Arm (the preferred code for unspecified areas of the arm).

‘Lower extremity’ is a general term that may refer to the lower leg, upper leg, knee, ankle, foot, or toes. If the specific area of the lower extremity is known, state and code that as the body part. Otherwise, use 36-Lower leg (the preferred code for unspecified areas of the leg).

Injuries to the distal or proximal areas of the long bones (*i.e.*, humerus, ulna, radius, femur, tibia, fibula) may be coded as either the arm/leg or the associated joint (*i.e.*, wrist, elbow, shoulder, ankle, knee). It is especially important to record the clinical details exactly as stated in the ED record and choose the body part code based on the detail. Code the joint if (1) joint involvement is described, or (2) the detail specifically refers to the “end” of the bone (e.g., “distal end of femur”).

#### **Eye Injuries**

For injuries to the eyelids, eyebrows, or the area immediately around the eyes (periorbital), use code 76, Face. For an injury to the eye itself, use code 77, Eyeball.

## Throat

“Throat” refers to the front of the neck, as well as the passage through the neck that leads to both the digestive and respiratory tracts. If the ED record indicates that an object is in the “throat,” do not assume that it refers to the respiratory tract. Use other information in the ED record to determine where the object is located (e.g., “a splinter in the skin of the neck,” “inhaled the object,” or “foreign body removal from the esophagus”).

## Injury Diagnoses Affecting the Entire Body

As shown below, body part code 85, All of body, must always be used with four diagnosis codes. In addition, body part code 0, Internal, must always be used with two other diagnosis codes.

Diagnosis	Diagnosis Code	Body Part Code
Anoxia	65	85
Electric shock	67	85
Poisoning	68	85
Submersion (incl. drowning)	69	85
Aspirated foreign object	42	0
Ingested foreign object	41	0

## Disposition

(1 character)

Report the patient’s final disposition as it is recorded in the ED record. There are 7 NEISS disposition codes as follows:

Disposition	Code
Treated and released, or examined and released without treatment (also includes transfers for treatment to another department of the same facility without admission)	1
Treated and transferred to another hospital	2
Treated and admitted for hospitalization (within same facility)	4
Held for observation (includes admitted for observation)	5

## Product Involved (Product 1, Product 2, Product 3)

(4 characters each)

**Reportable** consumer products and recreational activities are listed alphabetically in this coding manual. Product codes that are underlined in the alphabetical reference are consumer products or other objects that fall outside of CPSC jurisdiction. Please note that the underlined products may only be coded if the case qualifies for a special study.

Up to three product codes may be entered into the Product 1, Product 2, and Product 3 variable fields for each NEISS case. If more than three products are involved in an incident, three must be coded and **all** products must be mentioned in the Comment field.

Consult the alphabetic reference to select the most appropriate product code(s). **CPSC recommends that NEISS coders use an electronic version of the coding manual to search for product codes.** An electronic version of the coding manual is on the Desktop of the NEISS laptop. To search a PDF version of the coding manual for a product code, use CTRL-F and type in the word you are looking for. If a product cannot be found in the NEISS coding manual and you believe it is reportable, it should be reported with temporary product code 9999, pending assignment of an appropriate product code.

CPSC will respond to a product coded 9999 with a message indicating the correct code for the product. Product code 9999 is to be used as a last resort and not as a substitute for thoroughly searching the coding manual. Use product code 5555 for poisonings and chemical burns to children under 5 years of age when the substance is unknown or cannot be found in the NEISS coding manual.

**When only one product is involved**, enter it as Product 1 and use zeroes for Product Codes 2 and 3.

*Note: if Product 2 is coded "0000," then Product 3 will automatically be coded "0000."*

Example:

86YOF slipped and hit her head on wet tile floor in her kitchen. DX: epistaxis  
Product 1 = 1807 (floor)  
Product 2 = 0000  
Product 3 = 0000

**When only two products are involved**, code them as Product 1 and Product 2, and use zeroes for Product Code 3.

Example:

52YOM riding a recumbent bicycle wearing helmet, ran into a park bench. DX: concussion  
Product 1 = 5040-Bicycles                      -or-                      Product 1 = 0687-Benches  
Product 2 = 0687-Benches                      Product 2 = 5040-Bicycles  
Product 3 = 0000                                      Product 3 = 0000

**Exception:** When two or more of the involved products are coded with the exact same product code, only enter the product code once.

Example:

22YOF on a road bike collided with another cyclist. DX: clavicle fracture  
Product 1 = 5040-Bicycles  
Product 2 = 0000  
Product 3 = 0000

When multiple products are involved, it does not matter in what order you enter them. **Exception:** When more than three products are involved, product codes that trigger special studies must be entered as one of the three variable product codes.

Example:

19MOF in a baby booster seat, not strapped in, reaching for something when fell to floor, hitting eye on corner of the table.  
Product 1 = 1556-Attachable high chairs  
Product 2 = 1807-Floors or flooring materials  
Product 3 = 4057-Tables  
-or-  
Product 1 = 1807-Floors or flooring materials  
Product 2 = 4057-Tables  
Product 3 = 1556-Attachable high chairs  
-or-  
Product 1 = 4057-Tables  
Product 2 = 1556-Attachable high chairs  
Product 3 = 1807-Floors or flooring materials

**Need for Specific Product Information**

The more specific the product information coded in a NEISS case, the more useful the data is to CPSC and other data users. Whenever possible, code specific product information rather than general categories of products, and include any details (e.g., brand name, model) about the product in the Comment. For example, “gas oven” or “electric convection oven” are more useful than just “oven”. As another example, report whether an injury from a saw involved a table saw, chain saw, portable circular saw, radial arm saw, hand saw, saber saw, *etc.*

***To get such detailed information, coders should continually encourage hospital triage staff, nurses, physicians, and physician’s assistants to record specific product detail. If you cannot get this kind of detail, at least try to emphasize the need to know whether the product was powered or motorized (e.g., gas, electric) or unpowered or manual (e.g., power saw, hand saw).***

If a product is not specified as “electric,” “powered,” or “motorized,” do not assume it is unless there is specific information in the ED record that makes it clear the product was powered (e.g., “patient injured while trying to start a lawn mower”, “injured by wood kick back while sawing”). The exception to this rule is when a saw or lawn mower is involved with an amputation – in these cases, do assume the equipment was powered.

**Assignment of Product Code**

The product code section of this manual provides an alphabetical listing of products and their corresponding NEISS product codes. When product code names include more than one product, there is an alphabetic listing for each product.

Example:

**Bedspreads, throws or comforters ..... 0667**

**Comforters**

Use: Bedspreads, throws or comforters ..... **0667**

**Throws**

Use: Bedspreads, throws or comforters ..... **0667**

The alphabetic list also includes cross-references for products whose names are not part of the product code title.

Example:**Afghans**

Use: Bedspreads, throws or comforters..... **0667**

**Handbags**

Use: Clothing accessories ..... **1647**

**Specific Product Codes**

Consult the alphabetic NEISS Product Codes section of the Coding Manual for the specific product code. When words such as electric, gas, or portable are used in the ED record, first look up the general product. For example, look up "Saws" rather than "Power saws," or look up "Blankets" rather than "Electric blankets."

When more than one code exists for a particular type of product, choose among the various eligible codes based on the information in the ED record.

Examples:**Pillows**

Choose among:

Pillows (excl. water pillows) ..... **4050**

Waterbeds or water pillows ..... **0662**

Nursing pillows

Use: Pillows (excl. water pillows) ..... **4050**

Baby pillow wedges/sleep positioners

Use: Baby mattresses or pads (excl.  
mattress covers or mattress pads)..... **1542**

**Paintbrushes or rollers**

Choose among:

Manual paintbrushes or rollers..... **0925**

Powered painting equipment

(incl. sprayers, rollers or brushes) ..... **0887**

If not specified as powered,

Use: Paintbrushes or rollers, manual ..... **0925**

**"Other" or "Not Elsewhere Classified" Products in a Category**

Some groups of products include a separate product code for "Other" or "Not Elsewhere Classified" products. Use this product code only when the ED record identifies a specific product, but there is no code given for that particular product. When you select a product code with "Other" or "Not Elsewhere Classified" in the title, please describe the particular product in the Comments.

Examples:**Baby carriers**

Choose among:

Baby slings and wraps ..... **1560**

Framed baby carriers (carried on the back) ..... **1561**

Other soft baby carriers ..... **1562**

Baby carriers (bicycle-mounted) ..... **1531**

Other baby carriers ..... **1549**

**Mixers**

Choose among:

Electric mixers ..... **0231**

Kitchen gadgets, not elsewhere classified ..... **0428**

**“Not Specified” Product in a Category**

If there is no description of the product to help you choose a specific code or an "Other" or "Not elsewhere classified" code, you may have to use a "Not specified" code. Not all product groups have a "Not specified" code. In those cases, choose the best code from among those listed.

Examples:**Soldering Irons**

Choose among:

Electronic soldering equipment ..... **0866**

Non-electric soldering equipment ..... **0868**

If type of soldering equipment is not specifically identified,

Use: Soldering equipment, not specified ..... **0859**

**Sanders**

Choose among:

Manual filing or sanding tools ..... **0862**

Power sanders ..... **0803**

If sander is not specifically identified as electric,

Use: Manual filing or sanding tools ..... **0862**

**Carving knives**

Choose among:

Electric or battery-powered knives ..... **0218**

Knives, not elsewhere classified ..... **0464**

**Product Categories Listed as “Also consider”**

"Also consider," a direction that accompanies many codes, suggests other products or groups of products that are related to the one already under consideration. Consider which most appropriately describes the product.

Examples:

**Bottle Openers** ..... **0422**

Also consider:

Can Openers

**Adult Games**

Choose among:

Video or electronic games

Use: Computers (equipment and electronic games) ..... **0557**

Games or game parts (excl. marbles  
and computer games) ..... **5019**

Also consider:

Sports

**Products Included in a Code**

Unless a product code title has qualifying words or phrases, it includes all varieties of that product with the exception of toys. For example, "Televisions" includes all sizes, black and white, color, free-standing, and cabinet models. However, a "toy television" is 5020, Pretend electronics, tools, housewares and appliances.

**Products Excluded from a Code**

Products excluded from a particular code are listed in parentheses immediately following the code title. These products appear elsewhere in the alphabetic list with their own separate code numbers.

Example:

**Manual cleaning equipment (excl. buckets or pails) ..... 0480**

The entry for manual cleaning equipment indicates that there is a separate entry for buckets or pails. This entry is shown below as it appears in the alphabetical list.

**Buckets or Pails ..... 1143**

**Product Parts**

For injuries involving only a particular part or *component* of a product, code the product as a whole. If the *source product* is not stated (e.g., pieces of glass, metal, wood, plastic, *etc.*), do not code the product.

Batteries (0884) and battery chargers/adapters (0883) are an exception to this rule, and are coded separately from the product with which they are being used.

<u>Scenario</u>	<u>Product Code</u>
Injured from tripping over a television cord	0572, Televisions
Injured on steps of a slide	1242, Slides or sliding boards (excl. Swimming pool and water slides)
Injured on piece of broken glass	Do not report
Injured on piece of broken glass from a storm window	1826, Storm windows
Swallowed a button battery from a TV remote	0572, Televisions, and 0884, Batteries
Burned when toy car battery charger caught fire	5021, Toy vehicles, and 0883, Battery chargers/adapters

**Combination and Convertible Products**

For combination and convertible products, check the product code cross-references for a specific product code (e.g., use 0555 for clock radios, use 0680 for sofa beds, use 1602 for combination hair dryer/straightener). If there is no specific product code listed, then code it according to how it was being used at the time of the injury or the specific hazard. For example, "sitting in convertible ladder chair that collapsed" should be coded as 4074-Chairs, other or not specified. If neither is known, code it based on the name of the product.

**Toys**

A product is considered a toy if it is specifically described as a toy (e.g., play money, toy watch, toy car, etc.) or if you can clearly assume from the information recorded that the product is a toy.

<u>Scenario</u>	<u>Product Code</u>
9YOM lacerated his leg while digging in the yard at home with a shovel	1403, Other unpowered tools
4YOM fell and cut lip while playing in the yard at nursery school with a toy shovel (record explicitly states "toy")	5020, Pretend electronics, tools, housewares, and appliances
2YOF lacerated hand on miniature plastic shovel obtained in cereal box; occurred in sandbox at neighbor's home (assume toy shovel from information in ED record)	5020, Pretend electronics, tools, housewares, and appliance

**Sports, Recreational Activities and Games**

The phrase "activity, apparel or equipment" accompanying sports and recreational activity codes means that any apparel or equipment contributing to an injury during a game or sport is coded as part of the product code for that sport. In addition, please specify the item of apparel or equipment in the Comments (e.g., football helmet, tennis racquet, ski binding, etc.). However, if apparel or equipment is not mentioned, but the activity or sport is specified, report the case, using the product code for the sport. If a patient is performing specific exercises while practicing for a sport, code the sport (not the exercise). For example, code 1205, Basketball for a patient injured while doing sprints in basketball practice.

<u>Scenario</u>	<u>Product Code</u>
Scalp lacerated by thrown tennis racquet at school	3284, Tennis (activity, apparel, or equipment)
Sprained ankle playing tennis at the recreation center	3284, Tennis (activity, apparel, or equipment)

**Poisoning or Chemical Burns to Children Less than 5 Years of Age**

When coding poisoning and chemical burns for children under 5 years of age, use the appropriate product code listed in the alphabetic section of the Coding Manual. If the product is not a consumer product, or if the product is unknown, and you cannot locate an appropriate product code in the alphabetic listing, report the case using product code **5555**.

Please remember, it is always important to report and code any other consumer product(s) associated with poisonings or chemical burns to children less than 5 years of age (e.g., pills were in a purse, drank meds in a water bottle, got into a medicine cabinet). If any non-consumer products are involved, mention those as well even if they do not have a product code (e.g., pill box, needle).

**"New" Product Codes for Consumer Products Not Found in Manual**

If you believe a case involves a consumer product, but you cannot determine an appropriate product code, or you have a coding question about any case and are not able to discuss the case with your CPSC NEISS Representative, you may use code **9999** temporarily. CPSC NEISS staff will review these cases and determine whether 1) a current NEISS product code can be used, or 2) a new product code should be added to the Manual. In either case, your CPSC NEISS Representative will contact you after reviewing the case.

**Product Coding for Special Types of Incidents**

Listed below are some situations that require special coding treatment.

**Product Fires, including Flammable Fabrics**

A product fire can be extensive (*i.e.*, with fire/flames) or limited (*i.e.*, with smoldering/smoke). Code the specific product(s) involved. If a burn or smoke inhalation injury results directly from a flammable fabric, code:

- The source of the fire (*e.g.*, stove, portable room heater, camping lantern, or other fire-causing item), and
- The first item to ignite (*e.g.*, blanket, clothing, draperies, slipcover, etc.)

In the field labeled "Fire", enter code 1, 2 or 3 to indicate whether or not the fire department attended (see the section on Fire Involvement).

**House Fires**

If there is a house fire, code any consumer product(s) mentioned (*e.g.*, stove, smoke alarm). In the case of a house fire and/or smoke inhalation where no specific consumer product is identified, use product code 1866, General home or room involvement in fires. Product code 1866 includes fires in single family homes, townhomes, manufactured (mobile) homes, and the living areas of apartments and condominiums. Use this code, for example, when the ED record describes the incident as "house fire" or "smoke filled apartment" and no other information is available. If known, state the particular room in the Comments (*e.g.*, flames in the basement, smoke coming from the garage).

In the field labeled "Fire," enter code 1, 2 or 3 to indicate whether or not the fire department attended (see the section on [Fire Involvement](#)).

**Hot Water**

Report all injuries involving hot water using product code 1934 (Hot water), even if a consumer product within CPSC jurisdiction is not stated. If the source of the hot water is known, then code 1934 (Hot water) along with the product code for the source (*e.g.*, teakettle, sink, bathtub). However, do not use 1934 for hot liquid that is part of prepared food or drinks (*e.g.*, hot soup, hot cocoa).

<u>Scenario</u>	<u>Product Code</u>
36YOF burned by hot water spilled from a teapot	0452-Coffee maker or teapots, not specified 1934-Hot water 0000-No third product
11MOM with scald burns from hot water, no further information	1934-Hot water 0000-No second product 0000-No third product

**Carbon Monoxide**

Report all injuries involving carbon monoxide that do not involve licensed motor vehicles, including when the source is unknown. Code the source of the carbon monoxide when known (*e.g.*, 0310-Gas furnace, 0118-Gas water heater). If the source of the carbon monoxide is unknown, use product code 1899. A second (or third) product code may be used with 1899 as long as it is not the source of the carbon monoxide (*e.g.*, carbon monoxide detector).

Do not assume the source of the carbon monoxide was a licensed motor vehicle based on location (*e.g.*, garage) unless there is other evidence to support this assumption.

**Gas Fumes or Gas Vapors of Unknown Origin**

Report all injuries involving gas fumes or vapors that do not involve licensed motor vehicles, regardless of the source. Code the source of the gas fumes or gas vapors when known (e.g., 0981-Gasoline cans). If the source of the gas fumes or vapors is unknown, use product code 1898. A second (or third) product code may be used as long as it is not the source of the gas fumes or vapors.

**Alcohol?**

(1 character)

If the ED record indicates that the **patient** consumed alcohol prior to or during the incident, select 1-Yes, and include the patient's alcohol concentration/level test results in the Comment. If there is no alcohol test result available, this should be stated in the Comment. If the ED record indicates that alcohol consumption is suspected, but there is no lab test available, then select 1-Yes and include this information in the Comment.

If there is no mention in the medical record of patient alcohol consumption, select 0-No.

Examples:

19YOM drank a few beers and then riding 4-wheeled ATV when turned too fast, flipped over, was not wearing a helmet. BAL 192. DX: Concussion, 8cm Laceration head  
Alcohol: 1-yes

33YOF with buttock bruising after she fell down her basement stairs while intoxicated, BAC not available. DX: fall, ecchymosis of buttock, alcohol intoxication  
Alcohol: 1-Yes

51YOF running in a marathon and was struck by a car that crossed the barriers. Driver was arrested for driving while intoxicated. DX: Fractured pelvis, pulmonary emboli.  
Alcohol: 0-No

**Drugs/Medication?**

(1 character)

If the ED record indicates the **patient** used, or is regularly using, a drug(s) or medication(s) **that contributed to the incident or the severity of the injury**, select 1-Yes and mention the drugs/medication (by specific or generic name if available) in the Comment.

If there is no mention in the ED record of a drug or medication that contributed to the incident or the severity of the injury, select 0-No.

Example:

59 YOM had been using heroin, states mattress caught fire, tried to put out, EMS pulled patient out of smoked-filled room. DX: smoke inhalation, opiate intoxication  
Drugs/Medication: 1-Yes

67YOF in bedroom at home, had slip and fall, states hit left index finger on wall during the fall, unable to stop the bleeding, patient is on warfarin. DX: laceration left index finger, warfarin-induced coagulopathy  
Drugs/Medication: 1-Yes

45YOM was riding a dirt bike in a parking lot and fell off, complains of left shoulder pain. Denies drugs & alcohol, DX: left scapula fracture.  
Drugs/Medication: 0-No

## Intent

(1 character)

Injury intent defines whether an injury was caused by an act that was carried out on purpose by oneself or by another person(s) with the purpose or goal of injuring or killing. Injuries may be unintentional or intentional. An injury may be inflicted by one person on another, or self-inflicted. An **unintentional** injury may be inflicted by oneself or another person(s), but is not inflicted deliberately with the aim of injuring or killing. An **intentional** injury is one that is inflicted (by oneself or another person) with the aim of injuring or killing.

The intent codes are shown in the following table. Each code is further defined below the table.

Injury Intent	Code
Unintentional, Unknown, Not Stated	0
Intentional or Assault (confirmed or suspected)	1
Self-Inflicted or Suicide – Intentional injuries including suicide, suicide attempt, or self-mutilation/self-harm (confirmed or suspected)	2
Legal Intervention (e.g., due to law enforcement activity)	3

### ***Unintentional or Unknown/Not Stated Intent***

An **unintentional** injury is an injury **not inflicted deliberately with the aim of injuring or killing**. Sometimes these injuries are referred to as "accidental." Unintentional injuries may be self-inflicted or inflicted by another person. NEISS coders should consider injuries unintentional **when no indication of intent to harm** was documented in the ED record or when the intent was unknown. This includes injuries resulting from neglect (failure to care for properly) when there is no documented abuse or assault.

#### Includes:

- child unintentionally shot self with handgun
- patient painting his house when fell off ladder and fractured foot
- child under age 5 ate unknown pills found on a countertop
- bicyclist rear-ended by a car at stop light
- patient hit a door in anger and fractured finger
- patient injured after inhaling aerosol "to get high"
- child play wrestling with father and sprained wrist falling off couch
- patient injured self while horsing around

### ***Intentional or Assault Intent***

Intentional or Assault injuries are injuries **intentionally or purposefully inflicted by one person on another person with the aim of injuring or killing**. Intentional/assault injuries include cases that involve intended and unintended victims of violent acts, civil disorders, and other conflict situations (e.g., riots, drive by shootings, strikes, terrorist activities, law enforcement officer injured while suspect is resisting arrest). Intentional/assault injuries **are only reportable when** (1) the victim and the perpetrator are age 12 or younger and the incident involves a consumer product within CPSC jurisdiction **OR** (2) a firearm is involved.

#### Includes:

- child stabbed with knife while fighting with classmate
- innocent bystander shot in drive-by incident
- victim pepper sprayed in eyes while fighting with friend
- victim shot by spouse during domestic dispute
- police officer shot by assailant during arrest

**Self-Inflicted or Suicide - Intentional injuries**

Self-inflicted or suicide-related injuries include confirmed or suspected injuries **intentionally or purposefully inflicted on oneself** where the medical record indicates that the **patient was trying to take his own life or harm himself** (e.g., suicide, suicide attempt, self-mutilation, self-harm). Self-inflicted or suicide-related injuries **are only reportable when** (1) the patient is 12 years old or younger **and** the incident includes a consumer product within CPSC jurisdiction, **OR** (2) a firearm is involved.

Includes:

- 24YOM with self-inflicted gunshot wound to the head, left a suicide note
- 12YOF slashing her wrists with knife in suspected suicide attempt

**Legal Intervention**

Injuries related to legal intervention are injuries **caused by** police or other legal authorities (e.g., security guards, bouncers) **during law enforcement activities**. This includes injuries sustained while in handcuffs or other restraints placed by police or other legal authorities, even in instances of evasion or flee. Injuries caused by police or legal authorities while off duty are not considered legal intervention. Injuries that occur as a result of legal intervention are **only reportable when** a firearm or personal protective device is involved, regardless of the age of the injured person.

Includes:

- patient shot, tear gassed, or pepper sprayed by police
- patient exposed to tear gas by police during demonstration
- patient pepper sprayed to eye by police
- patient was caught shoplifting and hit with pistol by security guard

Excludes:

- patient shot by spouse who is an officer during domestic dispute (code as intent=1)
- patient shot by off-duty officer in personal argument (code as intent=1)
- patient is officer, was shot by assailant during arrest (code as intent = 1)

**Location (of Incident)**

(1 character)

Code the location based on where the incident occurred using one of the codes in the table below.

<u>Location</u>	<u>Code</u>
Unknown or not recorded	0
Home	1
Farm/Ranch	2
Street or highway	4
Other public property	5
Manufactured (Mobile) home	6
Industrial place	7
School	8
Place of recreation or sports	9

Use locale code *1-Home* when the ED record contains information that the incident occurred at a private residence (e.g., single family home, townhouse, apartment, condominium), unless it is described as a mobile/manufactured home (locale code 6). Locale codes *1-Home* and *6-Mobile Home* include private areas inside and surrounding the residence, such as the garage, yard, and private driveway. For apartments and condominiums, use *5-Other public property* if the incident occurred in a common area (e.g., lobby, parking lot, swimming pool).

Some other examples of incident sites covered under each NEISS location code follow:

**Home – Code 1:**

Includes:

Houses, including single-family homes, townhouses, duplexes, *etc.*

Public swimming pools (excluding pools at apartments/condos, homes or hotels)  
Sports fields or stadiums

## Fire Involvement

(1 character)

If there was not a fire, or the fire did not involve unexpected flames/smoke or unexpected spread of flames/smoke, use code 0.

Use Codes 1, 2 or 3 (fire involvement) when the incident involved smoke inhalation, **unexpected** flames or smoke, or **unexpected** spread of flames or smoke. Choose Codes 1, 2 or 3 based on whether the fire department attended the fire (see table below).

Fire Involvement	Code
No fire or no flame/smoke spread	0
Fire involvement and/or smoke inhalation - Fire Department <b>attended</b>	1
Fire involvement and/or smoke inhalation - Fire Department <b>did not attend</b>	2
Fire involvement and/or smoke inhalation - Fire Department <b>attendance is not recorded</b>	3

Wildfire smoke exposure should be included in the fire codes 1, 2, or 3. Fire code 1 should be included if the narrative states that the fire department was on scene. However, if the patient was only exposed to smoke from a wildfire for which they do not know the source (e.g., smoke exposure from Canadian wildfires that spread into the US) or if it was unknown if the fire department was involved, then fire code 3 should be used.

All smoke inhalations should be coded with a fire code 1, 2 or 3, unless the smoke is solely from drugs or tobacco.

## Work-Related (Only if Firearm Involved)

(1 character)

Use this variable to indicate that the injury is associated with a work activity, exposure, or environment. **Only firearm-related cases are reportable as work-related (codes 1 & 3).**

Work-Related	Code
Not recorded	0
Work-related; occurred on the job (excluding active military duty)	1
Not work-related; did not occur on the job	2
Work-related; active military duty	3

An incident is reportable as work-related if it

- **involves a firearm**  
**AND**
- occurred "*at work*," "*on-the-job*," was "*occupational*," or the ED record implies the incident was work-related (e.g., "hit on head with gun while attempting to apprehend a suspect," or "shot in hand while delivering a pizza"); **or**
- occurred during *volunteer work for an organized group*, such as a volunteer fire fighter, volunteer in a hospital, or volunteer for a charity group (e.g., candy striper, volunteer cook at a homeless shelter); **or**
- occurred during *farm or other family-business* related duties, even when the patient is not working for pay (e.g., child performing farm chores or assisting at family restaurant); **or**
- is covered under workman's compensation.

Assume the injury is not work-related when the patient is age 12 and under and there is no other information about the incident.

## Victim Identification

For some incidents, CPSC staff conducts follow-up investigations with a victim or a victim's family member through telephone, internet, or on-site interviews. Follow-up investigations are conducted on less than one percent of NEISS cases. Investigation reports provide important details about the likely causes of the incident, including the interaction among person, product, and environment. Follow-up investigations are an opportunity for CPSC staff to collect details about brand names of products and product samples for testing in a laboratory. CPSC staff use this information to classify incidents by hazard pattern, determine actions needed to reduce or eliminate product hazards, identify defective or harmful products, and evaluate the effectiveness of product safety standards.

For the cases selected, CPSC will request a patient's name, address, and telephone number through a Victim identification (ID) screen in PC-NEISS. **Never send Victim ID information to CPSC by email.**

CPSC always protects patient confidentiality. CPSC destroys all Victim ID information once the follow-up investigation is completed.
