Prepared By: Yeon Kim (ykim@cpsc.gov) on January 27, 2022

CPSC Attendees: Yeon Kim, Scott Ayers, and Chen Su

Non-CPSC Attendees: Contact CSA for a list of attendees

Summary of Meeting:

Contact CSA for more details on this meeting.

This is the first TSC meeting since 2020. The TSC mainly focused on reviewing the progress of the task force reports and current action items.

The TSC reviewed the clause naming/titling task force progress for ANSI Z21.58 / CSA1.6 and formed a new task force to review open ANSI Z21.89 / CSA 1.18 change requests. Then, the TSC discussed the outstanding action items including the altitude limitation for testing the applicable appliances.

ANSI Z21.58 / CSA1.6 has gone through the public review, and there are two comments. The TSC discussed them and approved the disposition of them.

The TSC was not able to get to all items in the agenda in the allotted time. The meeting was recessed until a future date. The continuation of the meeting will be scheduled by a doodle poll in a near future.
