

MEETING LOG

SUBJECT: ANSI/CSA BOILER WORKING GROUP MEETING, January 28, 2026

FY 26 OP PLAN ENTRY: Gas Appliances - CO Sensors

DATE OF MEETING: 1/28/2026

LOCATION OF MEETING: Virtual

CPSC STAFF FILING MEETING LOG: Ronald A. Jordan

FILING DATE: 5/13/2026

CPSC ATTENDEE(S): Ronald Jordan, ESMC
Han Lim, ESMC

NON-CPSC ATTENDEE(S): Contact babak.owlam@csagroup.org for the full attendee list.

Summary of Meeting:

The boiler Working Group (WG) met to discuss several standards development issues associated with ANSI Z21.13- 8th edition, Standard for Gas-fired Low-Pressure Steam and Hot Water Boiler. The TSC working group discussed and resolved the following action items:

The ANSI/CSA Furnace WG chairman attended the ANSI/CSA Boiler WG meeting and provided an overview of the furnace WG's activities to-date. The presentation covered the following topics:

- Standards provisions the furnace WG developed;
- The CO detection device test provisions to be included as Annex T in the standard under development;
- The CO protective device requirements to be included as Annex U in the standard under development;
- The in-house test rigs that some furnace manufacturers are building to test products to the standard under development;
- The Validation Testing being funded by AHRI (Air-Conditioning, Heating and Refrigeration Institute, the trade association for the gas appliance industry); and
- CO Protective Device WG to be formed to develop a stand-alone standard.

The meeting adjourned at 5:00 pm.
