

MEETING LOG

SUBJECT: ASTM F15.72 Task Group Meeting on Torch and Lamp Fuel Devices

FY 26 OP PLAN ENTRY: Torch Fuel and Lamp Oil

DATE OF MEETING: 4/7/2026

LOCATION OF MEETING: Virtual

CPSC STAFF FILING MEETING LOG: Sharon White

FILING DATE: 4/10/2026

CPSC ATTENDEE(S): Sharon White, ESHF
Matthew Kreese, LSM

NON-CPSC ATTENDEE(S): Contact ASTM for the full attendee list

This meeting was led by the Chair of the task group, Jarrod Kuhn, Sterno. A summary of the meeting is below.

The 15-72 (25-01) ballot that was issued January 20, 2026, with a one-month comment period, was withdrawn due to negatives received around the title of the standard. There were eight negatives and several comments that the task group received. The negatives were consistent, all of which came from ASTM candle-industry stakeholders, who believed that the title would mislead users into thinking that the standard applied to traditional wax candles rather than oil-fueled candles. The task group revised the title to address the negatives. Also, the task group revised the standard's Introduction and Terminology section to further clarify the products that the standard covers.

Next Steps:

The next meeting is scheduled for April 28, 2026. The task group will continue to review the negatives and consider the comments.
