

# BEACH UMBRELLA SAFETY

Airborne beach umbrellas can be dangerous, even deadly.  
Make sure your beach umbrella stays anchored in the sand!

## TIPS:

- Spike your beach umbrella pole into the sand.
- Firmly rock it back and forth until it's buried at least 2ft. deep.
- Tilt it into the wind to keep it from blowing away and injuring someone. (Diagram 1a)
- Anchor the base of the pole with some form of anchor or weight.
- Ensure the sand is packed well around the base.
