Gas or charcoal grills, can present a risk of fire and/or carbon monoxide poisoning that could result in injury or death.

6,300 ER Visits in 2021 for gas & charcoal grill-related injuries

12 Deaths per year involving gas and charcoal grills (2016–2018 average)

Safety Tips:

- Check www.cpsc.gov to see if the grill has been recalled. If recalled, stop using it until it is repaired or replaced by the manufacturer.
- Look over the grill and any gas hoses for cracking, brittleness, holes and leaks. Replace, if necessary.
- Use grills outside only, in well-ventilated areas, and never indoors, in a garage, breezeway, carport, porch or under a surface that will burn.
- Never leave a hot grill unattended and keep children away from the grill area.
- Clean your grill with a ball of aluminum foil or nylon brushes, instead of wire grill brushes, to prevent stray wire brush strands from ending up in the food.
