Product: SCIEE Robots

Prepared By: Zachary Goldstein

Date of Log: 2/1/22

Attendees: Contact UL for a complete list of attendees

CPSC Attendees: Vineed Dayal & Zachary Goldstein

Meeting Summary:

Contact UL for more details of this meeting.

This is a weekly meeting for both TG4, Non-Robotic Function, and TG5, Audible Indicators, to conduct work.

TG4 chair completed their review of the gap analysis between existing reference standards. At the conclusion of the review, discussion opened to the TG member for feedback. TG members voiced general agreement on which standard to use as the main reference for UL 3300, given a slightly broader coverage of the topics in question for this TG. Discussion on how to incorporate this into UL 3300 will continue at future meetings.

TG5 continued their review of their draft document. TG members addressed comments not covered by previous meetings, and that had been added since its last presentation to the group. Special attention was given to the dB(A) level minimum requirements, to be used in conjunction with an environment-of-operation table. Discussion will continue next meeting.

The next TG4 and TG5 meeting is scheduled for 2/8/22.
