Summary of Meeting:

Dr. Jill Crisman, DSRI presented information on Artificial Intelligence and Digital Safety to CPSC staff. Dr. Crisman discussed her team's plan for the development of new frameworks to help ensure that systems that use digital intelligence are built with safety, ethics, and equity in mind. These include protecting individuals from threats of cybersecurity, privacy, poorly developed algorithms, and inaccurate information. She also presented the AI Incident Database (<https://incidentdatabase.ai/>), that indexes the history of harms or near harms realized in the real world by the introduction of artificial intelligence systems. CPSC staff gave an overview of our Internet of Things (IOT) project and our work in AI. CPSC stated our primary focus is where consumers can be physically harmed by connected products.
