or (301) 595-7054
(for deaf or hard of hearing individuals and/or individuals with speech and language disorders)

Keep Safe during **Wildfire Season**

- Weather and gusty winds may require power companies to cut off power in your neighborhood.
- Portable gas generators must be operated outside and at least 20 feet away from the home.
- Faulty or improper use of generators resulted in an average of 65 deaths a year.
- Install carbon monoxide and smoke alarms in your home and test them regularly.
- Have an evacuation plan in place.
- Monitor local alerts about wildfires and hazardous air quality in your area. Follow directions of state and local officials.
