SUMMARY:

This was the fifth meeting of the Chronic Hazard Advisory Panel (CHAP) on Phthalates and Phthalate Substitutes. Following introductions, Dr. Mirkes led a discussion of peer review. Then Dr. Mirkes discussed the work plan for completing the final report. Discussions on individual sections of the report followed. Versar presented some of the exposure assessment work that they are doing for the CHAP. Representatives from ExxonMobil provided information on DINP to the CHAP members.

On the second day the CHAP continued ITS discussion of the work plan. September 30 will be the last date for reviewing new publications unless they are of critical significance. The CHAP members requested additional speakers for the November meeting, which will be expanded to 3 days. The CPSC General Counsel joined the CHAP for additional discussion of peer review.

The CHAP will meet again on November 2-4, 2011 and January 19-20, 2012. They will have conference calls on September 20, 2011 and December 12, 2011. There will probably be one final in April, 2012.
