Statement of Work
(Contract# CPSC-D-12-0001 / Task Order 0011)
Exposure Assessment: Composition, Production, and Use of Phthalates

1. Description of Services

The contractor shall furnish all necessary personnel, materials, services, and facilities to perform the work set forth below.

The contractor shall conduct research regarding the production and use of specified phthalates in products. The specified phthalates are:

- DEHP: di-(2-ethylhexyl) phthalate (CAS number 117-81-7);
- DBP: dibutyl phthalate (84-74-2);
- BBP: benzyl butyl phthalate (85-68-7);
- DINP: diisononyl phthalate (28553-12-0, 68515-48-0);
- DIDP: diisodecyl phthalate (26761-40-0, 68515-49-1);
- DnOP: di-n-octyl phthalate (117-84-0);
- DIOP: diisooctyl phthalate (27554-26-3);
- DIBP: diisobutyl phthalate (84-69-5);
- DPENP: di-n-pentyl phthalate (131-18-0);
- DHEXP di-n-hexyl phthalate (84-75-3); and
- DCHP dicyclohexyl phthalate (84-61-7).

The contractor's investigation shall include the following factors:

- The raw materials used in the production of the specified phthalates;
- The manufacturing processes used worldwide to produce the phthalates;
- Estimated annual production of the specified phthalates;
- Physical properties (*e.g.*, vapor pressure, flashpoint, water solubility, temperature at which chemical breakdown occurs);
- Applications for phthalates use in materials and consumer and nonconsumer products; and
- Other potential routes by which phthalates can be introduced into an otherwise phthalate-free material (*e.g.*, migration from packaging, recycling, reuse, product breakdown).

Information about applications for the use of phthalates in materials and products shall focus on applications in which the material or product could contain phthalates at concentrations greater than 0.1 percent (1000 ppm). The research shall detail the material or product in which the phthalates are used, which phthalates are typically used, the reasons for including phthalates, and typical phthalate concentration ranges.

The contractor shall prepare a project plan detailing the contractor's planned activities. The contractor shall meet with the U.S. Consumer Product Safety Commission (CPSC or Commission) staff by teleconference to discuss the plan prior to the commencement of

the research. Any changes to the task list or project schedule shall be immediately communicated to the CPSC Contracting Officer Representative (COR) by email, with an updated task list and/or project schedule delivered within seven calendar days.

In addition, the contractor shall conduct a progress report meeting once per month after the task is awarded with the COR and/or designated staff. The project tasks and schedule will be reviewed. Technical issues, questions and other matters may be discussed.

The contractor shall provide electronic copies of the report and a list of all references examined during the research. Copies of references cited shall be made available to the Contracting Officer in paper or electronic form at the completion of the task.

All documents delivered shall contain the following information:

1. Date;
2. Contract Number;
3. Contractor name; and
4. Document author.

2. **Contract Type**

This is a firm fixed price task order with fully loaded hourly rates for the hours indicated in the schedule of services.

3. **Background**

Section 14 of the Consumer Product Safety Act (CPSA) requires third party testing of children's products for compliance to the applicable children's product safety rules. Section 108 of the Consumer Product Safety Improvement Act (CPSIA) restricts the presence of six phthalates in children's toys and child care articles.¹ A children's toy is a consumer product designed or intended by the manufacturer for a child 12 years of age or younger for use by the child when the child plays. A child care article is a consumer product designed or intended by the manufacturer to facilitate sleep or the feeding of children age 3 and younger, or to help such children with sucking or teething. The six prohibited phthalates cannot be present in children's toys or child care articles in concentrations above 0.1 percent. The limit applies to DBP, BBP, and DEHP in all children's toys and child care articles products, and to DnOP, DINP and DIDP in mouthable toys, as well as child care articles. Additionally, CPSC's Chronic Hazard Advisory Panel (CHAP) released a report titled *Chronic Hazard Advisory Panel on Phthalates and Phthalate Alternatives*.² In that report, the CHAP recommends that DIOP be subject to an interim ban from use in children's toys and child care articles at levels greater than 0.1 percent until sufficient toxicity and exposure data are available to assess the potential risks. The CHAP further recommends that DIBP, DPENP, DHEXP, and DCHP be permanently banned from use in children's toys and child care articles at levels greater than 0.1 percent.

¹ <http://www.cpsc.gov/PageFiles/129663/cpsia.pdf>.

² <http://www.cpsc.gov/PageFiles/169902/CHAP-REPORT-With-Appendices.pdf>.

The Commission has determined that some materials do not, and will not, contain lead (Pb) in excess of 100 ppm. These materials are listed in 16 C.F.R. § 1500.91.³ Component parts made from these materials are not subject to third party testing for certification purposes.⁴

In a similar manner, it may be possible for the Commission to determine that some materials do not contain any of the prohibited phthalates at levels that exceed the concentration limit, and thus do not require third party testing to assure compliance with section 108 of the CPSIA. In 2009, CPSC staff published a statement of policy regarding the use of phthalates in some materials.⁵ Section C of that document listed materials that may contain phthalates. While useful, that list is not considered comprehensive.

4. Objective

Under this task order, CPSC staff plans to research the worldwide manufacture and use of the prohibited phthalates in products and materials. For phthalate applications in products and materials, a comprehensive listing of the phthalate-containing products/materials, the phthalates used, and their concentrations will be created.

The objective of this task order is to acquire data to support Commission determinations regarding required third party testing.

5. Period of Performance

The period of performance shall be from September 15, 2014 through June 14, 2015.

6. Government Furnished Materials

There are no government furnished materials.

7. Deliverables or Performance

The contractor shall provide the requested information in the form of a written report. The report shall be in the format of a scientific report with full citations and tables, as appropriate. The reviewer shall e-mail the report to the COR in a Microsoft Word file.

8. Delivery Schedule

The contractor shall provide the service or deliverable listed in Table 2 per the delivery or performance listed.

Table 2. Delivery Schedule

Item(s)	Quantity	Delivery or Performance
----------------	-----------------	--------------------------------

³ <http://www.ecfr.gov/cgi-bin/text-idx?SID=ab4f9fdffa42c50cb72e8e725ac134d&node=16:2.0.1.3.79.0.1.37&rgn=div8>.

⁴ Compliance to the lead content limit of 100 ppm is always required for accessible component parts of children's products, irrespective of any testing requirements.

⁵ <https://www.cpsc.gov/PageFiles/126588/componenttestingpolicy.pdf>.

The Contractor and CPSC Contracting Officer's Representative (COR) will meet by teleconference to discuss and initiate the contractor's project plan.	1	Within 14 calendar days of project initiation.
The Contractor and CPSC COR will meet by teleconference for status updates.	As appropriate	At least once per month after project initiation
The Contractor shall submit a draft final report to the CPSC COR.	1	Within 150 calendar days after the initial teleconference.
The CPSC COR will provide written comments on the draft final report to the Contractor.	1	Within 14 calendar days after receipt of the draft final report.
The Contractor shall submit a final report to the CPSC COR.	The Contractor will revise the draft final report as appropriate.	Within 30 calendar days after receipt of comments.
Inspection and Acceptance	The Final report will be reviewed by the CPSC COR	Within 14 calendar days after receipt of the report

9. **Place of Delivery**

The contractor shall submit written materials by email to the COR, Dr. Kristina Hatlelid (khatlelid@cpsc.gov). If needed, the contractor may mail or send written materials by the deadlines to:

Kristina Hatlelid, Ph.D., M.P.H.
U.S. Consumer Product Safety Commission
5 Research Place
Rockville, MD 20850

Technical questions or clarifications about the documents should be directed to Dr. Kristina Hatlelid at 301-987-2558 or khatlelid@cpsc.gov.

10. **Inspection and Acceptance**

The Draft Final report submitted to the CPSC will be reviewed within 14 calendar days of receipt of the draft final report for any additional questions and/or comments. If returned to the contractor as a result of the review, the contractor shall address and/or revise their report accordingly and return the final version to the COR within 14 calendar

days of receipt. The CPSC COR will then have an additional 14 calendar days to review the Final report.

11. Requirement for CPSC Clearance

The final report is the property of the U.S. Consumer Product Safety Commission. The Contractor shall not publish the final report, present the information at scientific meetings, or in any other way make the findings public in any form without the written permission of the COR. Any publication must be cleared following CPSC procedures, as outlined in the CPSCA.
