1. PARTIES AND PURPOSE

This Interagency Agreement (IAG) establishes an agreement between the CPSC and the National Science Foundation (NSF), through which CPSC will provide funds to NSF for the Center for Environmental Implications of Nanotechnology at Duke ("the CEINT") to develop innovative tools for measuring the potential health impact of nanotechnologies used in the flammability treatment of thermoplastic and thermoset based consumer products and develop risk models for human exposure to materials released from these consumer products.

2. BACKGROUND

Nanotechnologies are used in globally sold consumer products (e.g., electronic computer housing, soft furnishings, and cosmetic products) to meet the market's and consumer's performance and cost requirements. In the last two years, many of the experimental nanotechnologies developed over the last decade have been evaluated by manufacturers, and a few (e.g., carbon nanofibers and nanotubes) are being or are planned to be incorporated into consumer products. There are several reasons driving the use of these nanotechnologies, but the most significant are that they appear to be a viable replacement for regulatory-banned flame retardants (there are no Environmental, Health and Safety restrictions on using these nanoparticles), they are being globally considered for enabling compliance with fire performance regulations e.g., CPSC mattress and upholstered furniture flammability standards, and because they impart potentially large performance improvements for the cost (the cost has significantly reduced and supply has significantly increased for these nanoparticles). Due to their rapid deployment, there are significant knowledge gaps in the environmental, health, and safety of these nanotechnologies and the consumer products containing these nanotechnologies. More specifically, there is a lack of robust risk models that consider multiple pathways for human exposure to materials released from the consumer products containing nanotechnologies. In addition, there is little information on the real impact these nanotechnologies may have on the flammability performance of consumer products.

3. NIST RESPONSIBILITIES

The CPSC has established a separate IAG with NIST (CPSC-I-11-0007) to develop materials containing various nano flame retardants described in Task 1 through Task 4 listed below. These materials will be provided to the CEINT for testing described in Task 5.

I. Task 1: Complete thermoset fabrication and stressing.
   i. NIST shall fabricate thermoset samples (polyurethane foam) containing 3 nanoparticles (carbon nanotubes, nanofiber, clay, and/or nanosilver).
   ii. NIST shall expose thermoset samples to a simulated chewing condition and collect released materials.

II. Task 2: Complete thermoplastic fabrication, and subcontractor agreement.
   i. NIST shall fabricate thermoplastic samples based on 2 polymers (poly(acrylonitrile-butadiene-styrene), polylactide, and/or poly(styrene-acrylonitrile)) used in electronic housing and containing 3 nanoparticles (carbon nanotubes, nanofiber, clay, and/or nanosilver).
   ii. NIST shall award a contract to a vendor with expertise in developing model/s of materials released from thermoplastics/thermosets.
III. **Task 3: Complete thermoplastic stressing and transfer of materials.**
   i. NIST shall expose thermoplastic samples to a simulated wear and tear abrasion condition and collect released materials.
   ii. NIST shall transfer ~1g of collected materials from stressing of thermoplastic and thermoset samples and as-received nanoparticles to subcontractor.

IV. **Task 4: Complete characterization and flammability testing.**
   i. NIST shall quantify (UV-VIS or ICP) and characterize (SEM) released materials from stressing thermoplastic and thermoset samples.
   ii. NIST shall measure fire performance of samples using Cone Calorimeter and retain char for potential future analysis and characterization.

4. **AUTHORITY**

The authorities for this agreement are:

(A) National Science Foundation Act of 1950, as amended (42 USC 1861-76)

(B) Section 29(d) of the Consumer Product Safety Act (15 U.S.C. 2076(g))

5. **TERMS AND CONDITIONS**

   (A) CPSC will transfer $250,000 to NSF as reimbursement for supplementing the CEINT for the activities contemplated by this agreement. This transfer will be made in advance. CPSC recognizes that there is a 6.57% cost recovery for NSF.

   (B) NSF shall provide funds to the CEINT to conduct the following research:

   The work will include experimental and risk modeling components. Data on the hazards of nanomaterial-polymer composites will be developed in experiments using zebra fish, comparing the effects of the nanomaterial alone (free nanomaterials), with those observed using fragments of nanomaterial-polymer composites obtained by abrasion, chewing or other methods to be developed and provided by NIST. The effects of wear material produced from identical polymer matrices that do not contain nanomaterials, using the same abrasion/chewing methods, will also be evaluated. Scale factors will be developed to compare the effects of the nanomaterial composites with nanomaterials alone with the objective of mining more extensive literature data on the hazards presented by free nanomaterials since data on nanomaterial effects when embedded in polymeric matrices are nearly non-existent.

   **Task 5.1 Experimental Comparison of Free and Embedded Nanomaterial Effects.** Task 1 will examine the effects of ENM, ENM composites, and polymer matrices on uptake and tissue distribution in adult and developing embryonic zebrafish. This will involve exposures to gravid adult zebrafish and directly to embryos with subsequent ENM analysis to quantify bioaccumulation and tissue distribution. Developmental endpoints addressed will include mortality, growth, and teratogenesis assessed in embryos.

   **Task 5.2. Development of Risk Model.** A Bayesian network-based tool will be developed to assess ENM risk on the basis of fundamental physical-chemical properties and the nature of polymeric matrices that may contain nanomaterials. The modeling effort will consider multiple pathways for human exposure and forecast risk based on estimates of exposure and the hazard information obtained in Task 1 as well as from literature data, appropriately extrapolated through the scaling procedure developed in Task 1. Exposure information obtained from NIST will also be incorporated into the risk forecasting model.

6. **REPORTING REQUIREMENTS**

The CEINT will provide to CPSC an interim report documenting the toxicity testing protocols, risk modeling tools and the resulting data at the completion of each task. An interim report will also be completed at the end of each fiscal year. The first interim report will be due September 28, 2011. Within
60 days of completion of the tasks 5.1 and 5.2, the CEINT will issue a draft final report for CPSC staff review. Following CPSC staff review, the CEINT will have an additional 30 days to deliver the final report summarizing the test data.

7. CPSC FURNISHED MATERIALS AND EQUIPMENT

CPSC will provide to the CEINT samples of flame retardant nanomaterials extracted from hard and soft materials matrices as described in paragraph 3.

8. DATA SHARING

The CEINT will submit to the CPSC any report, manuscript or other document containing the results of work performed under this agreement before such document is published or otherwise disclosed to the public in order to assure compliance with Section 6(b) of the Consumer Product Safety Act (15 USC 2055(b)), Commission regulations (16 CFR Part 1101), and a Commission Directive (Order No. 1450.2). This clearance restricts disclosure of information that: (1) permits the public to identify particular consumer products, or (2) reflects on the safety of a class of consumer products. Prior submission allows the CPSC staff to ensure compliance with applicable disclosure provisions. CEINT researchers agree to consult with CPSC staff and to provide any drafts of reports or presentation materials to CPSC staff for review; CPSC staff will review and return any such materials within 10 business days.

9. DISCLAIMERS

(A) All documents and other materials developed pursuant to this IAG shall have the appropriate statements to indicate the work was performed pursuant to the IAG by the CEINT; that the documents and other materials produced are the views of the staff or members (past or present) of the CEINT; and that although the documents and other materials may have been developed in conjunction with CPSC staff, the documents and other materials do not necessarily represent the views of the CPSC.

(B) Any publication or publicity pertaining to, the work performed under this agreement shall include the following disclaimer:

"This project was partially funded by the U.S. Consumer Product Safety Commission. The content of this publication does not necessarily reflect the views of the Commission."

10. ACCOUNTING DATA

Treasury Account Symbol (TAS)/Appropriation Code:
NSF: TAS for Program = 491/20100 for ACR funds = 4910180
CPSC: 6110100
These funds will expire on: 9/30/11

Business Event Type Code:
NSF: COLL
CPSC: DISB

Business Partner Network (BPN) number/DUNS number:
NSF: 074811803
CPSC: 069287522

Tax Identification Number (TIN)
NSF: 53-0206152
CPSC: 520978750

Agency Location Code:
NSF: 49-00-0001
CPSC: 61-00-0001
11. DURATION OF AGREEMENT AND AMENDMENTS

This agreement will become effective when signed by the parties. The agreement will terminate 18 months after signature of the agreement by both parties, but may be amended at any time by mutual written consent of the parties.

12. DISAGREEMENTS

In the event that CPSC and NSF have a disagreement arising under this interagency agreement, the parties shall cooperatively seek to resolve the disagreement by themselves. If the disagreement cannot be resolved between them, the parties agree to seek the assistance of a third party in resolving the disagreement.

13. CONTACTS

The contacts of each party to this agreement are:

Alan Tessler, PhD
National Science Foundation
Telephone: 703-292-7198
Email: atessler@nsf.gov

Treye Thomas, PhD
U.S. Consumer Product Safety Commission
Telephone: 301-504-7738
Fax: (301) 504-0079
Email: tthomas@cpsc.gov

The parties agree that if there is a change regarding the information in this section, the party making the change will notify the other party in writing of such change.

### TRANSMITTAL MEMO

**Date:** September, 1, 2011

**To:**
- [x] DGA
- [ ] DACS/Cooperative Support
- [ ] DACS/Contracts Branch

**From:** (Directorate/Division) BIO/DBI
- Program Officer (name | phone ext): Alan Tessier ext. 7198
- Administrative POC (name | phone ext): Donna Webb ext. 4477

**Subject:** Interagency Agreement (insert requesting agency name) Consumer Protection Safety Commission (CPSC)

**Requesting Agency Agreement #:** CPSC-I-11-0016

- **Yes**  **No**  Are the specific NSF grants/cooperative agreements/contracts that the other agency's funding will be supporting identified in the interagency agreement (IAA)?

If "yes", then please provide detailed information for each NSF proposal or contract to be funded with the subject interagency agreement [attach detailed list for multiple proposals]:

[Note: No NSF grants to be awarded with American Recovery and Reinvestment Act (Recovery Act) funds can be selected for support with other agency funds.]

**NSF award/proposal or contract #:** 0830093 - original CA (1157493 - supplement)

**PI Name (first & last):** Mark Wiesner

**Awardee Organization/Vendor name:** Duke University

**Amount to be Obligated (exclude NSF admin fee):** $233,575

**NSF Program Org Code:** 08080000

**NSF Thematic Code:** Nano Centers 13

If funds to be obligated are not yet identified to specific awards, is there a signed Memorandum of Understanding (MOU) approved in accordance with NSF clearance procedures that explains 1) the purpose NSF is accepting the funds, and 2) the plan for obligation of the Requesting Agency's funds this fiscal year (if applicable)?

- **Yes**  **No**

If no, please contact your cognizant Grants and Agreements or Contracts Officer before proceeding.

If yes, please insert link to the MOU ______, or provide a copy to your cognizant Grants and Agreements or Contracts Officer.
Incoming Interagency Agreement Transmittal Memo
Page 2

Incoming Interagency Agreement Checklist:

☑ Clearly stated project description or scope of work that identifies the specific activities to be supported by the IA

☑ Project performance period reflects proposed grant/contract period separately from the period of availability of the funds for obligation

☑ Requesting Agency's Statutory Authority

☑ Acknowledgement of NSF's administrative cost recovery (ACR) rate to be applied against (deducted from) the total transferred

☑ Financial Data Sheet for Interagency Agreements completed by other federal agency including contact information provided for the following: (need email addresses and phone numbers)
  - Requesting Agency Program Official
  - Requesting Agency Certifying Official (e.g., Contracts/Grants/Budget Officer)
  - Requesting Agency Finance/Billing Official

☑ Received confirmation that no Recovery Act funds are being transferred by other agency (also refer to list of new Treasury Account Fund Symbols created for the Recovery Act)

☑ Funds represented in only whole dollars (NSF cannot process acceptance of cents)

☑ Payment/Billing identified as "reimbursement" or "advance" basis

☑ Disputes/Amendments/Termination clauses included in agreement

☑ Signature by Requesting Agency Certifying Official

☑ Copy of approved MOU (if applicable - can be made available electronically) — NA

☑ Special clauses to be included in NSF award/contract (if applicable) — NA

NSF Program Official Recommendation:

This subject interagency agreement (IAA) is herein recommended for acceptance and meets the guidelines and data requirements for incoming agreements. Any grants, cooperative agreements, or contracts, including supplements to existing awards, issued as a result of the subject IA will be awarded in accordance with NSF policies and procedures. Monitoring of the executed agreement, timely provision of identified deliverables (where appropriate), and any requests for extension of the agreement to coincide with any approved extensions of the resultant grant/contract will be handled by the cognizant NSF program official.

Signature

Alan Tessier, Program Director

* To calculate correct ACR amount as a percentage of the program support funds, divide the program support funds by 0.9343, which equals the total amount to be transferred (the difference between this calculated total and the program support funds is the exact ACR amount – MUST be rounded to nearest whole dollar)
