

Manufacturer: Cobra Plastics Inc.
Model: 65 mm NICR
ASTM Type: VIIA

Description:

This package consists of a one-piece plastic aerosol overcap, which fits over the rim on an aerosol container (Figure 1).

Figure 1

Inside the overcap there is a cup designed to fit over the spray valve area of the container (Figure 2). The cup inside the overcap has two cutouts 180° apart, which match up with two squeeze tabs 180° apart on the outside of the overcap. The two squeeze tabs 180° apart on the outside of the overcap are slotted on three of their four sides to distinguish them from the rest of the overcap (Figure 1). The aerosol package is opened by squeezing the two tabs and simultaneously pulling off the overcap (Figure 3).

There are no manufacturer's instructions on the closure.
