SUMMARY OF MEETING: The committee discussed and resolved all ballot comments. Minor editorial changes were accepted. Issues of finger entrapment prevention specifications and the color-contrast and conspicuity of warnings in instructional literature was deferred to the next ballot. The accepted wording becomes a standard on June 10th. Side height recommendations were discussed and debated as excessive, given that only several incidents exist where a child fell out of a bassinet and the side heights of the units in those incidents are unknown. Some members felt that deeper bassinets could promote caregivers placing more soft, pillowy items inside, thereby increasing suffocation hazards. The CPSC was asked to check other country's side height requirements. The sleep position statement was presented and will be included in next ballot. The
