**LOG OF MEETING
DIRECTORATE FOR ENGINEERING SCIENCES**

SUBJECT: F15.53 Subcommittee on Non-Integral Firearm Locking Devices

DATE OF MEETING: April 24, 2002

PLACE OF MEETING: ASTM Headquarters, West Conshohocken, PA

LOG ENTRY SOURCE: Roy W. Deppa, ESME *RWD*

COMMISSION ATTENDEES: Roy W. Deppa, ESME

NON-COMMISSION ATTENDEES: See Attached Attendance List

SUMMARY OF MEETING:

The purpose of the meeting was to discuss and decide upon inclusion of various requirement provisions in the proposed voluntary standard for gunlocks.

Paul Schildhouse, Master Lock, asked for approval of the minutes of the February meeting. Roy Deppa, CPSC requested deletion of a sentence attributing to him the statement that he "did not feel there was enough difference between the (hacksaw) tests, and he decided not to pursue saw testing". Susan Peschin, CFA, requested that the minutes state that she seconded the motion to eliminate the sawing test for purposes of discussion. These changes were agreed to, and the minutes passed.

Kathie Morgan passed out a copy of the updated membership report. This report shows 22 producers and 30 non-producers, although it lists distributors such as the firearms manufacturers who sell and distribute gunlocks (including private-label products) as users and not producers.

Roy Deppa, CPSC, summarized the previous day's organizational meeting for a standard for gun lockboxes.

A lengthy discussion of the proposed test for impact tests using a fixture was concluded with the request that Kirk Rice, NIST, and Roy Deppa, CPSC, conduct tests using NIST's laser device to determine the velocities of handheld cable locks and hammers. This information is needed to determine the impact velocity for cable lock impacts and for impactor velocity for the trigger lock test. Further discussion of the test procedures and requirements was tabled until these data become available.

There was a lengthy discussion on the issue of allowing certification to the standard based upon a test using an actual gun instead of the generic fixture for trigger locks. The purpose of such certification would be to address a trigger lock made for application to a specific gun, that might not allow proper attachment to the generic fixture. Roy

Deppa asked for an opportunity to consult with others at CPSC on the issue of alternative certification paths. He stated that labeling to make the consumer aware at the point of purchase that the product is certified only when used on the specified gun may be acceptable if the alternative certification is approved.

A draft instruction that had been prepared by Larry Keane, NSSF, was discussed. Roy Deppa provided a number of comments on the label, urging that it follow the guidelines of the ANSI Z535 standards as closely as possible. Not all of the points were taken, but the draft was improved considerably by more closely meeting the intent of labeling guidelines. CPSC input included a request to simplify language, for instance, using the word "gun" in place of "firearm". Several industry members objected, apparently on the grounds that "gun" may be understood to mean "cannon", but Mr. Deppa read from two pages of quotes from NRA and other publications that use the word "gun", clearly not suggesting "cannon".

Attachment

F15.53 Membership Report - April 19, 2002

The membership list of Subcommittee F15.53 is attached. Members have been classified according to the subcommittee scope which is "the development of standards for nonintegral firearm locking devices."

Subcommittee F15.53 has a total of 59 members with the following classification and voting interest tally:

Producer Voters	22	Producer Non Voter	1
User Voters	10		
Consumer Voters	6	Consumer Non Voter	1
General Interest Voters	14	General Interest Non Voters	4
		Unclassified	1

The Subcommittee does meet ASTM's balance requirements with 22 producer voters and 30 non-producer voters. Members with non voting status include representatives of the US CPSC and multiple representatives from the same organization.

F15.53 members are asked to verify their contact information and advise Kathie Morgan of any corrections that need to be made. In particular, please look beneath your name for your e-mail address. Add if missing or correct if in error. Thank you.
