CPSC Staff Statement on Qualtrics, “Consumer Attitudes and Behaviors Regarding Product Safety”

The report titled, “Consumer Attitudes and Behaviors Regarding Product Safety,” presents the findings of research conducted by Qualtrics International Inc. (“the contractor”), under Contract No. 61320620F0086, Information Collection for Online Survey on Hazard Communication to Consumers.

This research included a survey that collected nationwide feedback from a census-matched sample of adults in the United States. The purpose of the survey was to assist CPSC staff in understanding consumer attitudes and behaviors regarding consumer product safety, and ultimately, to improve the communication of hazards associated with consumer products. The survey requested input from participants, including, but not limited to, their general thoughts and behaviors pertaining to consumer product safety, their purchasing behaviors and decisions, whether they read and follow safety messaging for various product types, their experiences with product recalls, and their tool ownership. The report identified the following results, among others:

- Attitudes towards product safety and likelihood of reading and sharing safety information about products varied between, and especially within, age groups. In various scenarios, fewer than half of the participants reported reading safety information for products and sharing or receiving safety information for shared products in their households.
- The top three sources to determine a product’s safety were reportedly safety information included with the product (72%), Consumer Reports or similar publications (59%), and U.S. government safety notices (53%).
- Before buying a product, customer reviews (51%) and product ratings (45%) were top sources of information across nearly all product categories.
- Purchase price (78%) and quality (74%) were top considerations across all categories for buying a product. Product safety was a leading consideration for baby products (63%).

---

1 This statement was prepared by the CPSC staff, and the attached report was prepared by Qualtrics, for CPSC staff. The statement and report have not been reviewed or approved by, and do not necessarily represent the views of, the Commission.

2 The U.S. nationwide survey was distributed online through mobile and desktop browsers to 5,013 volunteer participants ages 18 years and older. The survey used a form of non-probability sampling, called quota sampling, which enabled the contractor to approximate recruitment for U.S. census-matched survey participants from the Midwest, Northeast, South, and West regions. Participants were recruited using an online sample provider through various mediums, including email invitations, in-app notifications, and SMS notifications. The appendix to the report provides the participant demographics, including age, gender, ethnicity, income, education, and number of children in the household, as well as other qualifying factors.
Regarding a recent purchase, participants tended to report they kept the instructions (81%) and read all the safety information in the instructions (79%) and labels (72%).

The top reason participants gave for following safety information was because they agreed with the messages (47%).

The top reason participants gave for not following safety information was because they had used similar products before without sustaining any injuries (43%).

Most participants reported they followed all instructions provided in recall notices (80%).

The top reason participants gave for not following a recall notice was they believed they could avoid the hazard (29%).

More than half the participants reported having common tools, such as a hammer (80%), crosshead screwdriver (non-powered; 77%), flathead screwdriver (non-powered; 76%), tape measure (73%), pliers (73%), adjustable wrench (70%), hex key/wrench set (68%), utility knife (63%), step ladder (60%), and powered drill (55%).

CPSC staff will consider the findings from the survey in determining potential areas for assessing and improving hazard communication to consumers.

Appendix A provides the contractor’s report on Consumer Attitudes and Behaviors Regarding Product Safety.

Appendix B provides the contractor’s survey on Consumer Attitudes and Behaviors Regarding Product Safety.

3 Percentages above are the percentages of participants that provided the specified response.
Appendix A – Report on Consumer Attitudes and Behaviors Regarding Product Safety
Agenda

1. Background & Methodology
2. Overall Safety Concerns with Consumer Products
3. Purchasing Considerations
4. Reading & Following Safety Information
5. Recall Knowledge
6. Appendix
Background & Methodology
Background & Methodology

Background
• The U.S. Consumer Product Safety Commission (CPSC) supports safety of consumer products by developing mandatory safety standards, managing and arranging product recalls, and directly educating consumers on product safety and any associated risks.
• The current study collected nationwide feedback, beginning with general product safety questions, followed by questions for specific product types. Although the data are not nationally representative for generalizing, the results of the study demonstrate concerns of interest and help inform future work.

Study Objectives
• Understand consumers’ general thoughts on product safety.
• Determine what consumers are paying attention to when purchasing specific products and where safety ranks within their purchasing decision.
• Identify which product types are more or less likely to lead to consumers reading and following safety instructions.
• Determine when consumers follow instructions from a recall notice.

Methodology

Survey length
10 minutes

Dates fielded
4/18/22 – 4/27/22

Sample
• N=5,013
• Must have purchased a product in one of the qualifying categories in past 3 months

Sample Cuts
• Sample demographics for general questions (i.e., age)
• Product category for specific product type questions (e.g., apparel and textiles)
Overall Safety Concerns with Consumer Products
## Determining When a Product is Safe to Use

Attitudes towards product safety and likelihood of reading and sharing safety information about products varied between and especially within age groups. The majority of respondents claimed that they read safety labels on the products they own.

## Top 3 Sources of Information for Product Safety

Across all ages, respondents stated safety information included with the product is one of the best sources to determine its safety. Older adults were more likely to rely on standardized documents including consumer reports and notices, while younger adults were more likely to rely on others including customer reviews, family/friends, and social media.

Purchasing Considerations
Purchase Locations by Product Category

More often than not, respondents purchase products in person for nearly all categories. Large appliances, large tools, and arts and materials are more likely to be purchased in person while electronics are slightly more likely to be purchased online.

State by Product Category

Most respondents purchased brand new products, regardless of category. Big ticket items including furniture, large appliances, and large tools were more likely to be purchased used compared to other product types.

Reading & Following Safety Information
## Safety Information Included by Product Category

Many respondents tended to report their products came within instructions sheets and safety labels, except for apparels and textiles. Respondents who purchased baby products, electronics, large appliances, and large tools were most likely to claim their product includes safety information.

Recall Knowledge
Following Recall Notices

Of respondents who had seen a recall notice for an item they owned, most tended to report they followed all instructions within the notice.

- Yes: Did everything the recall notice asked of them (80%)
- No: Did not do everything the recall notice asked of them (14%)
- Don't remember: Don't remember if they did everything the recall notice asked of them (6%)

Base to those who have seen a recall notice about any currently or previously owned item (n=1,754)
Actions of Recall Notice

Of respondents who had seen a recall notice, they stated the most common notice requested them to get a replacement item.

- Get a replacement item from the company or store: 46%
- Return the item: 39%
- Discard the item: 20%
- Use the product in a way that avoids the hazard: 17%
- Fix it yourself according to the instructions in the notice: 16%
- Other: 6%
Reasons for Not Following Recall Notice

Respondents stated a wide variety of reasons for why they did not follow the recall notice. Just under a third claimed they did not follow the notice because they believed they could have avoided the reported hazard.

Appendix B – Survey on Consumer Attitudes and Behaviors Regarding Product Safety
Survey on Consumer Attitudes and Behaviors Regarding Product Safety

Prepared for: U.S. Consumer Product Safety Commission
Prepared by: Qualtrics International Inc.
Contract No. 61320620F0086

Start of Block: Introduction Block

Intro The U.S. Consumer Product Safety Commission (CPSC) is trying to improve its communication of hazards associated with consumer products. By “consumer products,” we are referring to products for personal use by consumers, such as clothing, toys, furniture, infant products, art materials, and fireworks. We are not referring to automobiles, food, drugs, cosmetics, or medical devices.

There are no “right” or “wrong” answers to the questions in this survey. What matters is your honest and valuable feedback for improving product safety. Your identity will not be associated with your responses, and it will remain strictly confidential. Your participation in this survey is completely voluntary. You may end the survey at any time; however, your responses will not be recorded if you end the survey before completing all of the items. On average, this survey should take no more than 10 minutes to complete.

Thank you so much for taking the time to help make our country a safer place.

NOTE: You will not be able to go back to previous pages of the survey. Please do not click your web browser’s “back” button.

- West Virginia
- Wisconsin
- Wyoming
- Other U.S. Territory
- I do not reside in the United States

End of Block: Block 1: Quotas and Screeners

Start of Block: Block 2: General Questions
Q6 To what extent do you agree or disagree with each of the following statements?

<table>
<thead>
<tr>
<th>Statement</th>
<th>Strongly agree</th>
<th>Agree</th>
<th>Neither agree nor disagree</th>
<th>Disagree</th>
<th>Strongly disagree</th>
</tr>
</thead>
<tbody>
<tr>
<td>Consumer products sold to Americans are safe because there are regulations in place to ensure product safety.</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>U.S. retailers verify that the products they carry are safe.</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Most safety labels are used on products because a few people were injured doing something they shouldn’t have done.</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Products intended for older children (older than 12 years old), teens, or adults cannot contain dangerous levels of toxic chemicals.</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>I read the safety labels on products I own before the first time I use them.</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
I read the safety labels on products I don’t own (such as equipment at a gym) before the first time I use them.

I read all of the safety messages in instruction manuals for products before using them.

If a product looks safe, I’m not going to look for safety information.

When I buy a product that other people in my household will be using, such as a toaster, I tell them what’s on the safety label, if there is one.

When other people in my household buy a product, they tell me what is on the safety label, if there is one.
Q7 In trying to decide if a product is safe to use, rank the following with 1 being the best source of information. 
Please drag the sources of information to rank them in your preferred order.

_____ Myself
_____ Family, friends, and/or neighbors
_____ Customer reviews
_____ Social media (e.g., blogs)
_____ Safety information that comes with the product (e.g., safety labels)
_____ U.S. government safety notices and messages
_____ Consumer Reports or other similar publications
Q8 In the past 3 months, did you buy products that fit into any of the following categories? Select all that apply.

☐ Apparel and textiles (e.g., clothes, bags, jewelry, blankets)

☐ Art materials (e.g., paint, watercolors, clay, brushes/rollers)

☐ Baby products (e.g., cribs, strollers, pacifiers, rattles)

☐ Toys (e.g., dolls, board games, building blocks, learning kits)

☐ Sports and recreation (e.g., bicycles, frisbees, musical instruments, dumbbells)

☐ Electrical product or electronics (e.g., computers, powered tools, toasters, vacuums)

☐ Large appliances (e.g., ovens, refrigerators, washing machines)

☐ Large tools and equipment (e.g., lawn mowers, portable generators, all-terrain vehicles, shovels)

☐ Furniture (e.g., chairs, couches, dressers, tables)

☐ Housewares (e.g., pots, cooking utensils, non-powered tools, wall décor)

☐ None of the above

Category: $\{e://Field/Category\}$
Q9 You mentioned you purchased a product of the category $e://Field/Category$ within the past 3 months. 
If you have purchased multiple products from this category within the past 3 months, think of the most recent product you purchased when answering the following questions.

Where did you purchase this product?

- Online
- In person
- Catalog
- Other: ________________________________________________

Q10 Still thinking about this product of the category $e://Field/Category$, was this product new or used when you bought it?

- Brand new
- Used (second-hand)
- Unknown
Q11 Which of the following did you consider when you purchased this product of the category ${e://Field/Category}? Select all that apply.

- Purchase price
- Additional costs, such as maintenance and operating costs
- Manufacturer or seller reputation
- Product safety
- Convenience
- Quality
- Features

- None of the above
Q12 Did you rely on any of the following sources of information before buying this product of the category ${e://Field/Category}? Select all that apply.

- [ ] Product photos
- [ ] Product packaging
- [ ] Product ratings
- [ ] Customer reviews
- [ ] Recommendations from social media (e.g., blogs about the product)
- [ ] Recommendations from family, friends, and/or neighbors with the product
- [x] None of the above
Q13 Which of the following were the top three reasons you purchased this product of the category ${e://Field/Category}?

- Purchase price
- Additional costs
- Product safety
- Convenience
- Quality
- Features
- Product ratings
- Recommendations from others (e.g., customer reviews, social media, friends, family)

Other: ____________________________________________
Q14 For this product of the category ${e://Field/Category}, which consideration was the most important?

- Purchase price
- Additional costs
- Product safety
- Convenience
- Quality
- Features
- Product ratings
- Recommendations from others (e.g., customer reviews, social media, friends, family)
- Other:

End of Block: Block 3: Purchasing

Start of Block: Block 4: Post-Purchase

Post-purchase text In the following questions, we’ll ask you about your purchase after you received the product. It’s important for us to see if some types of safety messages are more likely to reach consumers than others, and what role, if any, the product type plays. There are no right or wrong answers.

Q15 Regarding your recent purchase from category ${e://Field/Category}, the product:

<table>
<thead>
<tr>
<th>Came with an instruction sheet, booklet, or similar</th>
<th>Yes</th>
<th>No</th>
<th>Don’t remember</th>
</tr>
</thead>
<tbody>
<tr>
<td>Had safety label(s) attached to the product</td>

</tbody>
</table>
Q17 For what reasons didn’t you read all the safety information for the product from category ${e://Field/Category}? Select all reasons that apply.

☐ The product looked simple.

☐ I have used the product or similar products before without injury.

☐ I know or have heard of other people that used the product or similar products without injury.

☐ The hazards about this product are obvious to me.

☐ I don’t think there is a safety issue.

☐ There were too many safety messages.

☐ Other: __________________________________________________________________________

__________________________________________________________________________________
Q18 Why did you read the safety information for the product from category $\text{Category}$? Select all reasons that apply.

- [ ] The product looked complicated.
- [ ] I am not familiar with the product.
- [ ] I know or have heard of other people that have been hurt while using the product.
- [ ] I was not sure if there were safety issues I needed to know.
- [ ] I thought there might be safety issues.
- [ ] There were not that many safety messages to read.
- [ ] There were many safety messages.
- [ ] Other: ____________________________________________

Other: ____________________________________________
Q19 For what reasons didn’t you follow all the safety information for this product from category ${e://Field/Category}$? Select all reasons that apply.

- [ ] I disagreed with the safety messages.
- [ ] I figured my chances of injury were low.
- [ ] Following the safety messages would have been inconvenient.
- [ ] I have used the product or similar products before without injury.
- [ ] I know or have heard of other people that used the product or similar products without injury.
- [ ] The safety messages didn’t explain clearly how I could be harmed by not following the messages.
- [ ] There were too many safety messages.
- [ ] I didn’t read the safety messages.
- [ ] Other: ________________________________________________
Q20 Why did you follow the safety information for this product from category $\{e://Field/Category\}$? Select all reasons that apply.

[ ] I agreed with the safety messages.

[ ] I figured my chances of injury were likely enough to warrant following the safety messages.

[ ] Following the safety messages was convenient.

[ ] I was not familiar with the product.

[ ] I know or have heard of other people that have been hurt while using the product.

[ ] The safety messages explained how I could be harmed by not following the messages.

[ ] There were many safety messages.

[ ] I didn’t read the safety messages.

[ ] Other: ________________________________________________

Q21 Now think about any products you have owned or previously owned. Have you ever seen a product recall notice about any currently or previously owned item? (Please do NOT include food, medications, or street automobiles.)

[ ] Yes

[ ] No

[ ] Don't remember
Q22 What type of product was it? 
*If there was more than one notice, think about the one that you saw most recently.*

- Apparel and textiles (e.g., clothes, bags, jewelry, blankets)
- Art materials (e.g., paint, water colors, clay, brushes/rollers)
- Baby products (e.g., cribs, strollers, pacifiers, rattles)
- Toys (e.g., dolls, board games, building blocks, learning kits)
- Sports and Recreation (e.g., bicycles, frisbees, musical instruments, dumbbells)
- Electrical products or electronics (e.g., computers, powered tools, toasters, vacuums)
- Large appliances (e.g., ovens, refrigerators, washing machines)
- Large tools and equipment (e.g., lawn mowers, portable generators, all-terrain vehicles, shovels)
- Furniture (e.g., chairs, couches, dressers, tables)
- Housewares (e.g., pots, cooking utensils, non-powered tools, wall décor)

- Other: __________________________________________________________
Q23 Which of the following actions did the recall notice ask you to do? Select all that apply.

☐ Return the item.

☐ Discard the item.

☐ Get a replacement item from the company or store.

☐ Fix it yourself according to the instructions in the notice.

☐ Use the product in a way that avoids the hazard.

☐ Other: ________________________________

☐ Don’t remember

Q24 Did you do everything the recall notice asked you to do?

☐ Yes

☐ No

☐ Don’t remember
Q25 Thinking about the actions you chose not to do, why didn’t you do what the recall asked you to do? Select all that apply.

☐ It was inconvenient to follow the safety notice.
☐ It was expensive to follow the safety notice.
☐ It required me to modify the item.
☐ I didn’t agree with the safety notice.
☐ The hazard was something I could avoid.
☐ I stopped using it, but still have it.
☐ I threw it away.
☐ Other: ________________________________________________
Q26 Sometimes recalls involve consumers using tools to fix the products. Do you own any of the following tools? Select all that apply.

Note: You can see example photos below. Your tool may vary from these photos. We are interested in the capability rather than the specific tool. For example, your hammer may have a built-in nail remover, in which case you would select both “Hammer” and “Nail removing tool.”

☐ Tape measure
☐ Hammer
☐ Flathead screwdriver (non-powered)
☐ Crosshead (Phillips-head) screwdriver (non-powered)
☐ Nail-removing tool
☐ Pliers
☐ Utility knife
☐ Step ladder
☐ Hex (Allen) key/wrench set
☐ Adjustable wrench
☐ Powered drill
☐ Powered flathead screwdriver
☐ Powered crosshead screwdriver
☐ ☒ None of the above

End of Block: Block 4: Post-Purchase

Start of Block: Block 5: Demographics
Demo Intro  Lastly, we have a few demographic questions. Your responses will help us determine if we are underserving specific groups of consumers.

Q27 Do you currently have children under the age of 18?

- Yes, children living in the same household with me (either part or full-time)
- Yes, children living in a different household than me (full-time)
- No children under the age of 18

Q28 How many children under the age of 18 do you currently have?

- 0
- 1
- 2
- 3
- 4
- 5 or more

Q29 How old is your youngest child?

<table>
<thead>
<tr>
<th>Age</th>
<th>Months</th>
<th>Years</th>
</tr>
</thead>
</table>
Q30 My annual household income is:

- [ ] Less than $20,000
- [ ] $20,000 to $44,999
- [ ] $45,000 to $99,999
- [ ] $100,000 or more
- [ ] Don’t know
- [ ] Prefer not to answer
Q31 What is the highest degree or level of education you have completed?

- Less than high school
- High school graduate or equivalent (e.g., GED)
- Some college, no degree
- Trade/technical/vocational training
- Associate’s degree
- Bachelor’s degree
- Graduate or professional degree
- Doctorate degree
- Prefer not to answer

End of Block: Block 5: Demographics
